Geodesign by Integrating Design and Geospatial Sciences Danbi J. Lee, Eduardo Dias, Henk J. Scholten, 2014-11-24 In Europe the emerging discipline of geodesign was earmarked by the first Geodesign Summit held in 2013 at the GeoFort the Netherlands Here researchers and practitioners from 28 different countries gathered to exchange ideas on how to merge the spatial sciences and design worlds This book brings together experiences from this international group of spatial planners architects landscape designers archaeologists and geospatial scientists to explore the notion of Geodesign thinking whereby spatial technologies such as integrated 3D modelling network analysis visualization tools and information dashboards are used to answer what if questions to design alternatives on aspects like urban visibility flood risks sustainability economic development heritage appreciation and public engagement The book offers a single source of geodesign theory from a European perspective by first introducing the geodesign framework then exploring various case studies on solving complex dynamic and multi stakeholder design challenges This book will appeal to practitioners and researchers alike who are eager to bring design analysis intelligent planning and consensus building to a whole new level **Geo-Design** Steffen Nijhuis, Sisi Zlatanova, Eduardo Dias, Frank van der Hoeven, Stefan van der Spek, 2016-12-01 Geo Design Advances in bridging geo information technology and design bring together a wide variety of contributions from authors with backgrounds in urban planning landscape architecture education and geo information technology presenting the latest insights and applications of geo design Geo Design is here understood as a hybridization of the concepts Geo representing the modeling analytical and visualization capacities of GIS and Design representing spatial planning and design turning existing situations into preferred ones Through focusing on interdisciplinary design related concepts and applications of GIS international experts share their recent findings and provide clues for the further development of geo design This is important since there is still much to do Not only in the development of geo information technology but especially in bridging the gap with the design disciplines The uptake on using GIS is still remarkably slow among landscape architects urban designers and planners and when utilized it is often restricted to the basic tasks of mapmaking and data access Knowledge development and dissemination of applications of geodesign through research publications and education therefore remain key factors This publication draws upon the insights shared at the Geodesign Summit Europe held at Delft University of Technology in 2014 All contributions in the book are double blind reviewed by experts in the field Urban Informatics and Future Cities S.
