Geofile Sichuan Earthquake:

The Politics of Crisis Management in China Sonny Shiu-Hing Lo, 2014-11-14 This book analyzes the ways in which the Chinese government and military responded to the 2008 Wenchuan earthquake in Sichuan province. It adopts a comparative and historical perspective in studying the responses of the Chinese government in the first critical 72 hours, the mobilization of the People's Liberation Army and its difficulties, the assertive and important role of the non-governmental groups which established a partnership with the state in the rescue operations and the process and politics of reconstruction. The book is rich in materials including comparative case studies of the Tangshan earthquake in 1976, the outbreak of the Severe Acute Respiratory Syndrome in 2003, the earthquakes in Haiti, Chile and Myanmar, and the contrasts with the Japanese earthquake tsunami in 2011. Researchers, government officials, policy analysts, seismic specialists, journalists and students will find this book extremely useful, conceptually insightful and practically policy relevant.

The Wenchuan Earthquake of 2008 Yong Chen, David C. Booth, 2012-09-11 The Wenchuan Earthquake of 2008: Anatomy of a Disaster gives a detailed account of the damage, seismology and tectonics of the event and discusses earthquake prediction, seismic hazard and risk management, the creation and implementation of building codes and new practices used in rescue, relief and reconstruction. It will be of significant interest to researchers and practitioners engaged in seismology, geophysics, engineering, the social sciences and disaster management and recovery. It also offers a valuable new and unique Chinese perspective with many insights for future mitigation of earthquake risk. Professor Yong Chen works for the China Earthquake Administration. Dr David C Booth works for the British Geological Survey.

Earthquake lessons from China Chen, Kevin Z, Zhang, Qiang, Hsu, Claire, 2016-04-13 The Wenchuan County earthquake of 2008 was the most severe earthquake as measured in sheer magnitude in the history of the People's Republic of China. Killing almost 90,000 people and creating economic losses of 84.5 billion yuan (US 13.2 billion), the earthquake also elicited a vigorous response from various government agencies, private businesses and nongovernmental organizations (NGOs). The ways these actors responded to the earthquake proved effective in distributing appropriate aid to those in need and the areas where the actors' earthquake response needs to be improved are discussed and analyzed in *Earthquake Lessons from China: Coping and Rebuilding Strategies*. The authors identify three earthquake responses that proved helpful to earthquake-affected communities: the use of a pair-wise aid policy in which a donor province or city is assigned to give aid to a particular earthquake-affected area; expanded NGO and volunteer involvement; and various kinds of public financial aid to earthquake-affected households. They also pinpoint areas that need further work: public aid specifically for home reconstruction, which has been inadequate; and the capacity of local communities to manage their own disaster responses, which is too low. Perhaps most important, the authors found that the high levels of NGO and volunteer involvement in disaster response should be expanded and sustained beyond what they were in the aftermath of the 2008 earthquake. The authors believe that increased nonpublic sector involvement can not only improve the

level of response to natural disasters but also foster a robust civil society and grassroots democracy in China **The Politics of Crisis Management in China** Shiu Hing Lo, 2014 This book analyzes the ways in which the Chinese government and military responded to the 2008 Wenchuan earthquake in Sichuan province It adopts a comparative and historical perspective in studying the responses of the Chinese government in the first critical 72 hours the mobilization of the People's Liberation Army and its difficulties the assertive and important role of the non governmental groups which established a partnership with the state in the rescue operations and the process and politics of reconstruction The book is rich in materials including comparative case studies of the Tangshan earthquake in 1976 the outbreak of the Severe Acute Respiratory Syndrome in 2003 the earthquakes in Haiti Chile and Myanmar and the contrasts with the Japanese earthquake tsunami in 2011 Researchers government officials policy analysts seismic specialists journalists and students will find this book extremely useful conceptually insightful and practically policy relevant **Unshakeable Sichuan** Jing Fu, 2010
