The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In *The Drone Memos* civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is

Stefan Schmalz, Brandon Sommer, 2019-07-24 The 2008 global financial crisis and the subsequent Eurozone crisis triggered dramatic changes in European labour relations Unemployment and precariousness increased considerably This was further

exacerbated by austerity measures leading to declining minimum wages and layoffs in the public sector. These structural changes varied considerably by country but collectively pose challenges to organized labour as they confront neoliberal restructuring. Concurrently, recent social struggles continue to develop with unemployed and precarious workers playing a major role as protest actors. Focusing on the triangular relationship of precariousness, trade unions, and social movements, this book draws on a range of exciting cases, both comparative and country case studies, in order to understand how the shadow of the crisis still haunts organized labour in Europe. The chapters in this collection each offer a unique perspective on how the results of the crisis in Western, Southern, and Eastern Europe are leading to a variety of new social movements as a consequence of increased precariousness and also how trade unions are attempting to respond.

Exiled Home, Susan Bibler Coutin, 2016-04-15. In *Exiled Home*, Susan Bibler Coutin recounts the experiences of Salvadoran children who migrated with their families to the United States during the 1980-1992 civil war. Because of their youth and the violence they left behind, as well as their uncertain legal status in the United States, many grew up with distant memories of El Salvador and a profound sense of disjuncture in their adopted homeland. Through interviews in both countries, Coutin examines how they sought to understand and overcome the trauma of war and displacement through such strategies as recording community histories, advocating for undocumented immigrants, forging new relationships with the Salvadoran state, and for those deported from the United States, reconstructing their lives in El Salvador. In focusing on the case of Salvadoran youth, Coutin's nuanced analysis shows how the violence associated with migration can be countered through practices that recuperate historical memory while also reclaiming national membership.

Rebuilding an Enlightened World, Bill Ivey, 2018-08-01. Today, the long-assumed belief in the permanence of an enlightened world is suddenly open to challenge. Human rights, participatory government, and social justice are losing global influence, and the world of ordinary people is pushing back against Enlightenment conceits. Islam and the Liberal State Stephen H. Jones,2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening

The Essence of Desperation Bryan Riddle,2018-01-05 Counterinsurgency is a doctrine premised on winning the population of a nation state over to the government s side Counterinsurgency is also associated with a continuing presence of military forces for long periods and significant aid expenditures As such it is a curious strategy to employ in the midst of wars seen as failing and when the population has turned against the conflict This book examines counterinsurgency s emergence in Vietnam Iraq and Afghanistan in order to understand how it is employed in the midst of these perceived war fighting failures In doing so it thinks of strategy as narrative that describes how actions will result in better future effects In so doing this book traces the ways in which the strategy making process overcomes fragmentation to produce consensus It concludes that through the examination of how actors analogies and narratives are produced and deployed into strategy debates the reasons for counterinsurgency s emergence in crisis periods can be determined This approach enables a better understanding of the dynamics of policy making and how geostrategic change occurs
