Remote Sensing for Archaeology and Cultural Landscapes Diofantos G. Hadjimitsis, Kyriacos

Themistocleous, Branka Cuca, Athos Agapiou, Vasiliki Lysandrou, Rosa Lasaponara, Nicola Masini, Gunter Schreier, 2019-06-07

This book investigates the added value that satellite technologies and remote sensing could provide for a more sustainable mapping monitoring and management of heritage sites be it for purposes of regular maintenance or for risk mitigation in case of natural or man caused hazards One of the major goals of this book is to provide a clear overview on policy perspectives regarding both space policy as well as heritage policy and to provide possible suggestions for common ground of these two fields in Europe and around the world Readers will develop a good understanding of cutting edge applications of remote sensing and geographic information science and the challenges that affect heritage maintenance and protection Particular attention is given to Earth observation and remote sensing techniques applied in different locations This book brings together innovative technologies concrete applications and policy perspectives that can lead to a more complete vision of cultural heritage as a resource for future development of our society as a whole *Popular Culture as Everyday Life*

Dennis Waskul, Phillip Vannini, 2015-11-19 In *Popular Culture and Everyday Life* Phillip Vannini and Dennis Waskul have brought together a variety of short essays that illustrate the many ways that popular culture intersects with mundane experiences of everyday life Most essays are written in a reflexive ethnographic style primarily through observation and personal narrative to convey insights at an intimate level that will resonate with most readers Some of the topics are so mundane they are legitimately universal sleeping getting dressed going to the bathroom etc others are common enough that most readers will directly identify in some way watching television using mobile phones playing video games etc while some topics will appeal more or less depending on a reader's gender interests and recreational pastimes putting on makeup watching the Super Bowl homemaking etc This book will remind readers of their own similar experiences provide opportunities to reflect upon them in new ways as well as compare and contrast how experiences relayed in these pages relate to lived experiences The essays will easily translate into rich and lively classroom discussions that shed new light on a familiar taken for granted everyday life both individually and collectively At the beginning of the book the authors have provided a grid that shows the topics and themes that each article touches on This book is for popular culture classes and will also be an asset in courses on the sociology of everyday life ethnography and social psychology **Unmanned Aerial**

Remote Sensing David R. Green, 2020-07-10 Unmanned Aircraft Systems UAS are a rapidly evolving technology with an expanding array of diverse applications In response to the continuing evolution of this technology this book discusses unmanned aerial vehicles UAVs and similar systems platforms and sensors as well as exploring some of their environmental applications It explains how they can be used for mapping monitoring and modeling a wide variety of different environmental aspects and at the same time addresses some of the current constraints placed on realizing the potential use of the
