arising from the musical instrument found within every individual but also as a means of communication with social psychological and didactic functions Presenting research from myriad fields of study beyond music including psychology education sociology computer science linguistics physiology and neuroscience the contributors address singing in three parts Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009 the Social Sciences and Humanities Research Council of Canada funded a seven year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing AIRS Together global researchers from a broad range of disciplines addressed three challenging questions How does singing develop in every human being How should singing be taught and used to teach How does singing impact wellbeing Across three volumes The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions defining the current state of theory and research in the field Volume II Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer wishes to become a singer works with singers or is interested in the application of singing for the purposes of education

Too Simple to Fail R. Barker Bausell, 2010-11-01 *Too Simple to Fail* presents a startling dissection of what is wrong with our educational system and a set of simple common sense steps for improving it This simplicity Bausell argues characterizes both the schooling process and the science of education as witnessed by legions of researchers who have discovered precious little that their grandmothers didn't already know Yet surprisingly based upon the author's own studies and a review of the past 30 years of educational research these discoveries boil down to a simple but powerful theory The only way schools can increase learning is to increase the amount of relevant instructional time for all students Here Bausell demonstrates that classroom instruction is hopelessly obsolete as are our current testing practices both contributing to the widening opportunity gap between socioeconomic and racial groups But with an understanding of what is wrong with education today comes the revelation that the answer to these deficiencies has been available to us all along in the form of the tutorial model the most effective instructional paradigm ever developed Only in recent years has it become feasible to simulate this extremely effective instructional medium as a universal option that in effect would allow schools to provide relevant instruction as a rule and not an exception If implemented a new world of opportunity and potential will finally be available to children whose learning is so crucial for our future The new model presented in this book has implications for identifying not only what is wrong with the way we educate our young but also why it is wrong and how the educational process can be made more efficient effective and fair

Still Not Equal M. Christopher Brown, 2007 *Still Not Equal* Expanding Educational Opportunity in Society addresses the successes and failures of *Brown v Board of Education* and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora The educational political and social influence resulting from *Brown* the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color Notwithstanding the obstacles barriers and enablers of educational occupational

and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning The pursuit of educational access attendance and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines
