Soft Skills in Education Jaap Scheerens,Greetje van der Werf,Hester de Boer,2020-08-25 This book examines the global movement of putting more emphasis on students social and emotional development in education It provides some order in the unstructured multitude of desirable socio emotional educational objectives and ambitions that have resulted from this movement and builds on a careful conceptual analysis It starts out by examining the roots of the movement and discusses different emphases Next it makes use of instructional and psychological constructs and theories to arrive at meaningful categorizations of major domains and types of social emotional skills One of the key assumptions is that social and emotional attributes are malleable by means of educational interventions The book reviews available research evidence for this assumption taking into account psychological studies and meta analyses It then creates new evidence based on a new meta analysis which concentrated on the effects of educational interventions on skills associated with the conscientiousness factor of the Big5 taxonomy In the final chapter the book discusses the implications for educational policy and practice a discussion in which attention is given to political and ethical questions about the desirability of treating social and emotional attributes as educational goals

Social Media in South India Shriram Venkatraman,2017-06-09 One of the first ethnographic studies to explore use of social media in the everyday lives of people in Tamil Nadu Social Media in South India provides an understanding of this subject in a region experiencing rapid transformation The influx of IT companies over the past decade into what was once a space dominated by agriculture has resulted in a complex juxtaposition between an evolving knowledge economy and the traditions of rural life While certain class tensions have emerged in response to this juxtaposition a study of social media in the region suggests that similarities have also transpired observed most clearly in the blurring of boundaries between work and life for both the old residents and the new Venkatraman explores the impact of social media at home work and school and analyses the influence of class caste age and gender on how and which social media platforms are used in different contexts These factors he argues have a significant effect on social media use suggesting that social media in South India while seeming to induce societal change actually remains bound by local

traditions and practices *Bilingualism and Bilingual Education: Politics, Policies and Practices in a Globalized Society* B. stations and 2 during the development process that follows The case studies in the book concentrate on a variety of topics from the impact of high speed rail on population growth in some station cities to the regional economic impacts that an HSR system can bring about to the larger territories it passes through to the potential of station cities to better attract firms or to experience increases in tourism and commerce They also assess planning strategies and experiences from station cities to draw lessons for future HSR planning policies The Chapters in this book were originally published in a special issue of European Planning Studies
