*A World More Concrete* N.D.B. Connolly, 2014-08-25 Many people characterize urban renewal projects and the power of eminent domain as two of the most widely despised and often racist tools for reshaping American cities in the postwar period In *A World More Concrete* N D B Connolly uses the history of South Florida to unearth an older and far more complex story Connolly captures nearly eighty years of political and land transactions to reveal how real estate and redevelopment created and preserved metropolitan growth and racial peace under white supremacy Using a materialist approach he offers a long view of capitalism and the color line following much of the money that made land taking and Jim Crow segregation profitable and preferred approaches to governing cities throughout the twentieth century *A World More Concrete* argues that black and white landlords entrepreneurs and even liberal community leaders used tenements and repeated land dispossession to take advantage of the poor and generate remarkable wealth Through a political culture built on real estate South Florida s landlords and homeowners advanced property rights and white property rights especially at the expense of more inclusive visions of equality For black people and many of their white allies uses of eminent domain helped to harden class and color lines Yet for many reformers confiscating certain kinds of real estate through eminent domain also promised to help improve housing conditions to undermine the neighborhood influence of powerful slumlords and to open new opportunities for suburban life for black Floridians Concerned more with winners and losers than with heroes and villains *A World More Concrete* offers a sober assessment of money and power in Jim Crow America It shows how negotiations between powerful real estate interests on both sides of the color line gave racial segregation a remarkable capacity to evolve revealing property owners power to reshape American cities in ways that can still be seen and felt today Brexit and After Kumiko Haba, Martin Holland, 2020-12-12 This book makes a new departure from others on the subject Not only does it analyze Brexit from the domestic point of view in the UK democracy social analysis and construction of new institutionalization with the EU it extends the analysis externally and reconsiders the EU and UK relationship with Asia and the implications for international relations and a new world order From this foundation this book presents a broad and diverse spectrum of views concerning Brexit and the EU For these reasons it serves as an original and excellent textbook for undergraduate and graduate students as well as for researchers of the EU and international relations Contributions to this volume are from the European Union Studies Association EUSA Asia Pacific Tokyo Conference and affiliated conferences at the following universities between 2017 19 Aoyama Gakuin University Tokyo Taiwan National University Taipei and Fudan University Shanghai Almost all of the authors have engaged in interdisciplinary research on the EU are members of the EUSA Asia Pacific and have made public presentations on Brexit and how it relates to the EU Asia international relations economics and institutions Therefore this book presents various aspects of Brexit and its aftermath from the perspectives of the disciplines of political science economics and international relations in its analysis of the UK the EU Asia and the future world order The EUSA Presidents

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration

Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics Excluded Richard D Kahlenberg, 2023-07-11 An indictment of America's housing policy that reveals the social engineering underlying our segregation by economic class the social and political fallout that result and what we can do about it The last acceptable form of prejudice in America is based on class and executed through state sponsored economic discrimination which is hard to see because it is much more subtle than raw racism While the American meritocracy officially denounces prejudice based on race and gender it has spawned a new form of bias against those with less education and income Millions of working class Americans have their opportunity blocked by exclusionary snob zoning These government policies make housing unaffordable frustrate the goals of the civil rights movement and lock in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans **Empire's Labor** Adam D. Rival Visions Dustin Gish,Andrew Bibby,2021-02-05 The emergence of the early American republic as a new nation on the world stage conjured rival visions in the eyes of leading statesmen at home and attentive observers abroad Thomas Jefferson envisioned the newly independent states as a federation of republics united by common experience mutual interest and an adherence to principles of natural rights His views on popular government and the American experiment in republicanism and later the expansion of its empire of liberty offered an influential account of the new nation While persuasive in crucial respects his vision of early America did not stand alone as an unrivaled model The contributors to *Rival Visions* examine how Jefferson's contemporaries including Washington Adams Hamilton Madison and Marshall articulated their visions for the early American republic Even beyond America in this age of successive revolutions and crises foreign statesmen began to formulate their own accounts of the new nation its character and its future prospects This volume reveals how these vigorous debates and competing rival visions defined the early American republic in the formative epoch after the revolution
