**Waxing Gibbous** Christopher D. Roe, 2015-12-09 We all have a powerful connection that exists just beyond in the hereafter Often it is the soul of a loved one who has passed on and looks over those who are lucky enough to have a guardian angel But a few of us are not so lucky for in the void lurk malevolent entities in search of human prey One such demon has its sights set on ten year old Alice Bennett Its mission is to drain the child of her faith in God along with any and all hope for survival and it must accomplish this before the waxing gibbous phase of the moon ensues As its time is short it devises a plan in which it will tell her three frightening true stories Will these nightmarish stories be enough to break down Alice's defenses leaving her open to eternal demonic possession Or does the pure innocence of a child reserve a clandestine defense greater than the awesome power of a malevolent eternal entity

and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere. And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever. Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance. Relevant research in cognitive science has revealed possible limitations in online learning. For example, the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion, and low learning efficiency in self-regulated learning. It follows that in the post COVID-19 era, online learning puts forward new requirements and challenges to contemporary students not only to their learning strategies but positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation, then possibly leading to inefficient learning and increased learning burden. Therefore, it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model.
