Handbook of Research in Education Finance and Policy Helen F. Ladd, Edward B. Fiske, 2008 Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy Because a full understanding of the important contemporary issues requires input from a variety of perspectives the Handbook draws on contributors from a variety of disciplines While many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand

Resources in Education ,1999-04 *Test Fraud* Neal Kingston, Amy Clark, 2014-06-27 There has been an increase in awareness and perhaps occurrence of individual and organized cheating on tests Recent reports of widespread problems with state student accountability tests and teacher certification testing have raised questions about the very validity of assessment programs While there are several books that specifically detail the issues of test security cheating on assessments few outline the statistical procedures used for detecting various types of potential test fraud and the associated research findings Without a significant research literature base the new generation of researchers will have little opportunity or incentive to improve on existing methods Enlisting a variety of experts and scholars in different fields of testing this edited volume expands on the current literature base by including examples of detailed research findings arrived at by statistical methodology It also provides a synthesis of the current state of the art with regard to the statistical detection of testing infidelity particularly for large scale assessments By presenting methods currently used by testing organizations and research on new methods the volume offers an important forum for expanding the literature in this area

Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access Maria Teresa Tatto, Justin Bruner, Fida Hussain Chang, Corvell George Cramfield, Tara Miyoko Kintz, Nai-Cheng Kuo, Sandra Kurtti Pylvainen, Andleeb Sharif, 2012-09-17 This book originated in a policy analysis class at Michigan State

University taught during 2010 Using Professor Tatto's unique approach to teaching policy analysis the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications we began exploring policies that were developed at the global level and that were implemented locally We investigated the surge of globally developed standards and regulations in an effort to improve education Our goal was to learn cross nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as Education for All EFA and its USA cousin No Child Left Behind NCLB We knew our work would be bounded by the time available in a one semester class and by resource constraints We did exploratory inquiry supported by literature reviews reports on rigorous research studies and in one case an exploratory case study The policies we chose to explore such as EFA and NCLB offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children the preparation of teachers to support diverse populations the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion Our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness We investigated the factors that seemed to interfere with successful implementation from conceptual theoretical and methodological perspectives In this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs The book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces The book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here The Testing Gap Jaekyung Lee, 2007-05-01 The objective of this book is to advance our understanding of the design implementation and evaluation of test driven external accountability policies for improving both academic excellence and equity This book provides new insights into debates about the efficacy of highstakes testing through critical synthesis of previous studies and through systematic analysis of the achievement gap trends over the past 15 years The core findings have implications for contemporary national and state policy efforts as mandated by NCLB to close the achievement gap The book alerts readers to scientific institutional and technical threats to the current test driven school accountability system and possible consequences if we fail to counteract those threats and continue the current policy course with underfunded mandates and an over reliance on testing and sanctions *Data Analysis for the Behavioral Sciences Using SPSS* Sharon Lawner Weinberg, Sarah Knapp Abramowitz, 2002-04-15 An introductory applied statistics text that can be used at either
