In the music classroom instructors who hope to receive aid are required to provide data on their classroom programs Due to the lack of reliable valid large scale assessments of student achievement in music however music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms From Australia to Taiwan to the Netherlands music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers In this two volume Handbook contributors from across the globe come together to provide an authority on the assessment measurement and evaluation of student learning in music The

Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms, how to assess specific skills or requirements, and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field.

The School Reform Landscape Reloaded Christopher H.

Tienken, 2020-10-30 *The School Reform Landscape Reloaded: More Fear, Myths and Lies* peels back the curtain of school reform to examine the tensions that exist between the democratic and equitable system of public education and the emerging dual system based on elite interests aimed at profit making and decreasing education equity. The author takes an in-depth and controversial look at school reform since the launch of Sputnik I. Education reform events, proposals, and policies are examined through the lens of progressivist philosophy and critical social theory. Some of the issues and policies critiqued include the neoliberal corporate influence on education, the Sputnik myth, A Nation at Risk, standardization, charter schools, and other relevant topics. The author provides an evidence-based view of the free market reform ideas, and he pierces the veil of the new reform policies to find that they are not built upon empirical evidence but instead rest solidly on foundations of myth, fear, and lies. Ideas for a new set of reform policies based on empirical evidence and supportive of a unitary, equitable, and democratic system of education are presented.
