OECD Reviews of Evaluation and Assessment in Education: Student Assessment in Turkey Kitchen

Hannah, Bethell George, Fordham Elizabeth, Henderson Kirsteen, Li Richard Ruochen, 2019-09-09 Turkey's education system stands out internationally as a success story. In recent decades participation has been vastly expanded becoming universal at lower levels of schooling and outperforming other middle income countries in upper secondary education. However the education system is also marked by disparities with only around half of 15 year olds acquiring the essential competencies they need for life and work. *Out-of-Field Teaching Across Teaching Disciplines and Contexts* Linda Hobbs, Raphaela Porsch, 2022-02-18 This edited book is a compilation of research by the members of the Out of Field Teaching Across Specialisations OOF TAS Collective and is the second book by the Collective. It extends from the work begun in the 2019 book *Examining the Phenomenon of Teaching Out of Field* by showcasing the broad range of research agendas and findings relating to this phenomenon internationally. This book provides research and commentary relating to the out of field teaching phenomenon in primary secondary and tertiary education and across different subjects. It provides snapshots of the effects causes measurement and other characteristics of out of field teaching in and across contexts including states and countries school types and school levels subjects and specializations. The different chapters provide commentary at different units of analysis and focus on the effects of out of field teaching for teachers and their students the school contexts cultures that do or do not support them the leadership practices that assign the teachers to out of field subjects and the systems that create perpetuate the need for out of field teaching assignments. OECD Reviews of Evaluation and Assessment in Education Romania 2017 Kitchen Hannah, Fordham Elizabeth, Henderson Kirsteen, Looney Anne, Maghnouj Soumaya, 2017-05-03 Romania's education system has made impressive strides over the past two decades with an increasing share of students mastering the basic competencies that they need for life and work But these average improvements mask significant disparities in learning outcomes and attainment with an What Mathematics Do Students Know and How is that Knowledge Changing? Peter Kloosterman, Doris Mohr, Crystal Walcott, 2015-09-01 This volume is intended for researchers curriculum developers policy makers and classroom teachers who want comprehensive information on what students at grades 4 8 and 12 the grades assessed by NAEP can and cannot do in mathematics After two introductory chapters on the design of NAEP the volume contains a chapter on the challenges in analyzing NAEP data at the item level followed by five chapters that report 2005 through 2013 student performance on specific assessment items These chapters are organized by content area and then by topic e g understanding of place value knowledge of transformations ability to use metric and U S systems of measurement and thus provide baseline data on the proportion of students who are able to complete the mathematics tasks currently used in the upper elementary middle and high school mathematics curriculum Additional chapters focus on student reasoning U S performance on international assessments and using construct analysis rather than percent correct on clusters of items to understand student knowledge on specific mathematics topics Several themes emerge from the volume One is that while the rate of improvement in mathematics learning in grades 4 and 8 has slowed in recent years it has slowed more on some topics than others Another is that relatively minor changes in wording can have significant effects on student performance and thus it is difficult to be specific about what students can do without knowing exactly what questions they were asked A third theme is that changes in performance over time can sometimes but not always be understood in terms of what students are taught For example there were substantial gains on several grade 4 items requiring understanding of fractions and that is probably because the amount of instruction on fractions in grades 3 and 4 has been increasing In contrast while relatively few twelfth grade students have ever been good at factoring trinomials performance on this skill seems to be decreasing This suggests that while more students are completing advanced mathematics courses in high school these courses are not helping in the area of factoring trinomials Finally there are limitations to using NAEP as a measure of student performance on the Common Core State Standards To the extent that NAEP can be used however the NAEP data show a substantial gap between expectations and performance
