Publisher's Monthly, 2001 **Human Biochemistry and Disease** Gerald Litwack, 2008-01-08 This textbook is specifically designed for upper division undergraduate or graduate students in life science or pre medical majors including dentistry or pharmacology who are required to take a biochemistry or medical biochemistry course but who are not necessarily biochemistry majors The book adopts a unique approach to the topic compared with other biochemistry textbooks currently available in that each biochemical subject is introduced by a human disease relating the biochemical principles to be developed in that chapter The goal is to make biochemistry more meaningful to the student who is not normally shown the connection between biochemistry and medicine Includes an abundance of figures Emphasizes human biochemistry Introduces each chapter with a relevant disease or clinical relationship **ACCA Options P5 Advanced Performance Management Revision Kit 2014** BPP Learning Media, 2014-06-01 The examining team reviewed P5 Practice Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try The questions in the Practice Revision Kit reflect the scenario based questions you will find on the exam **Target Detection by Marine Radar** John N. Briggs, 2004-12-03 Radar is a legal necessity for the safe navigation of merchant ships and within vessel traffic services is indispensable to the operation of major ports and harbours Target Detection by Marine Radar concentrates solely on civil marine operations and explains how marine surveillance radars detect their targets The book is fully illustrated and contains worked examples to help the reader understand the principles underlying radar operation and to quantify the importance of factors such as the technical features of specific equipment the weather target reflection properties and the ability of the operator The precision with which targets are positioned on the radar screen and with which their progress is tracked or predicted depends on how definitely they have been detected therefore a whole chapter has been devoted to the issue of accuracy The various international regulations governing marine radar are examined a brief historical background is given to modern day practice and the book does with a discussion of the ways in which marine radar may develop to meet future challenges **Pathogenetic mechanism and therapeutic target for inflammation in autoimmune disease** Jing Tian, 2024-03-13 *Myc as a Disease Target Beyond Cancer* Jonathan R. Whitfield, Mariano F. Zacarias-Fluck, John Sedivy, Yulia A. Nevzorova, 2024-09-02 Myc is a pleiotropic transcription factor fundamental for many cellular processes It is an infamous and highly studied oncogene with around 10 000 articles published in the last decade The majority of these link it to cancer The focus on Myc as a hot target in cancer has led to immense efforts from academia through to pharmaceutical companies being directed towards finding a Myc inhibitor Not surprisingly given its fundamental nature in many physiological processes Myc has also been linked to a large variety of pathologies other than cancer The growing efforts to develop Myc inhibitors as cancer therapies will have important implications for the treatment of these diseases too whether they have a clearly demonstrated aetiology linked with Myc or so far are only at early stages of

association with it Interestingly the activation of Myc may also prove helpful in the field of regenerative medicine and reversal of ageing The aim of this Research Topic is therefore to describe non oncological pathologies and conditions to which Myc modulation could be applied These will include conditions that have strong links to Myc and where Myc modulation has already been modelled as well as conditions that so far have more limited data linking them to Myc but where it seems to have a key role Authors will be expected to briefly review the particular disease and what is known to link Myc to it plus the possibility of any clinical trials in the near future

Revisiting Seed and Soil: A New Approach to Target

Hibernating Dormant Tumor Cells, 2nd edition Dalit Barkan,Ann F. Chambers,Angélica Santiago-Gomez,2023-03-07 Metastasis is the major cause of mortality in cancer patients Metastases can be present at the time of diagnosis or can occur years or decades after the removal of the primary tumor and treatment This long latency in the manifestation of recurrent metastatic disease is explained clinically by the persistence of quiescent tumor cells that disseminated early in the course of the disease from the primary tumor to select distant organs These residing disseminated tumor cells DTCs at distant organs lay dormant and asymptomatic until reawakened to form overt metastases Importantly the quiescent nature of these hibernating DTCs facilitates their resistance to conventional therapies that target actively dividing tumor cells Therefore unraveling the biology of dormancy and reactivation of the residing DTCs to life threatening lesions is of utmost importance in order to develop new therapeutic strategies to prevent the recurrent metastatic disease from ever emerging or to better treat these recurrent cancers The mechanisms underlying the biology of tumor dormancy and their reactivation to overt metastases are just beginning to emerge thanks to a growing appreciation of the potentially chronic nature of some cancers and the development of experimental model systems for their study In this Research Topic we will follow the journey of circulating tumor cells CTCs dispatching from the primary site until their successful lodging into a new and foreign site to become DTCs We will explore the intrinsic mechanisms along with microenvironmental cues and niches that they encounter during their journey that may dictate their fate
