One of the best things we can do for the world we live in is to buy an electric automobile. There are financial incentives for becoming green and one of them is purchasing an electric vehicle. The potential increase in the car's price is outweighed by the benefits. When weighing the pros and drawbacks of buying an EV, there are still factors to think about. Electric vehicles are powered by onboard rechargeable batteries. Not only do these batteries keep the automobile running but they also keep the lights and wipers operational. The battery capacity of electric vehicles is typically higher than that of conventional gasoline vehicles. Batteries of this kind are commonly used to kickstart a gasoline motor. The only real difference is that electric cars utilize a greater quantity of them to power the motor. **Porsche 924/928/944/968** Glen Smale, 2015-10-26 The story of Porsche's front-engined water-cooled transaxle cars Porsche 924 928 944 968 contains interviews with several of Porsche's key engineers, designers, and modellers who worked on the car in period.
