Math Course Activities 4th Grade:

Math & Stories Marian R. Bartch, 1997-02 Discover the math lessons students can learn from activities based on 56 carefully selected children's books. Each book offers 28 fully described activity units supported by three or four reproducible handouts. Units specify correlations to standards set by the National Council of Teachers of Mathematics. In activities based on reading Jumanji for example, students distinguish between probable and improbable events, do mapping on a coordinate grid, and write about what would happen if their own favorite game suddenly became real. Grades K-6. Answer keys illustrated.

Using Children's Literature in Math and Science, 1997 *Everyday Mathematics 3 Grade Teacher's Lesson Guide Volume 2* Max Bell, 2004 *Teaching New Literacies in Grades 4-6* Barbara Moss, Diane Lapp, 2009-11-24 Upper elementary students encounter a sometimes dizzying array of traditional and nontraditional texts both in and outside of the classroom. This practical handbook helps teachers in grades 4-6 harness the instructional potential of fiction, poetry, and plays; informational texts; graphic novels; digital storytelling; Web-based and multimodal texts; hip-hop advertisements; math problems; and many other types of texts. Twenty-four complete lessons promote critical literacy skills such as comprehending, analyzing, and synthesizing information and using writing to communicate new ideas and pose questions. Snapshots of diverse classrooms are accompanied by clear explanations of the research base for instruction in each genre. Ready to use reproducibles are included. **ENC Focus**, 1997 [Boost Your STEAM Program with Great Literature and Activities](#) Liz Knowles, Martha Smith, 2018-06-01 You've created a STEAM program in your library, but how do you work literacy into the curriculum? With this collection of resource recommendations, direction for program development, and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem-solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students. *Helping Your Child Learn Math* Patsy F. Kanter, Linda B.
