Color Expressions: an Art Educational Voyage Dr. Lonnie G. Ford, 2009-08-28 Several years ago I enrolled in a graduate course on educational research that focused on closing the achievement gap for African American children The course was structured to explore issues causes and concerns for the achievement gap Studying different educational outcomes reading books and articles we regularly shared our insights about some leading causes Most importantly we were instructed to stay within our subject areas when finding any contributions to that gap In my attempt to complete the assignment of researching possible causes in my discipline of art education I found myself frustrated and angry Why There were no research studies exploring how art education was a part of the equation leading to solutions in closing the gap In addition there were no basic instructions or curricula designed to make connections to the art student to develop critical thinking skills or to incorporate the use of students life experiences for learning Furthermore I felt that art education was used as a testing ground in urban schools like the Chicago Public Schools using Teaching Artists to teach art with no teaching certification or teaching qualifications Booth 2003 The purpose of this approach was to use their knowledge and practices of art to influence change in students learning This kind of experiment branched away from any real effort to integrate art education and truly recognize it as a viable core subject area While conducting research for the course I found that researchers defined the achievement gap between white and African American students solely in terms of the four core subjects of math science social studies and language arts with no attention given to art education e g Berlak 2001 Honig

2001 Limn 2000 Sacks 2000 A study by the National Black Caucus entitled Closing the Achievement Gap Improving Education Outcomes for African American Children November 2001 reports Make improving the literacy skills of students a top priority Students who cannot read will experience little success in school Reading is the key to academic achievement in every subject ranging from math and English to science and history We must put reading first by finding initiatives and programs designed to strengthen the reading skills of students particularly low performing students Again there was no mention of art As both an African American and an art teacher I found it very disturbing that the recommendations of many national and local art educational organizations and schools failed to address the importance of teaching art education in African American urban school settings My dissertation research ultimately arose from this concern Research in Education ,1974 Research Anthology on Balancing Family-Teacher Partnerships for Student Success Management Association, Information Resources,2022-10-28 The partnership between families and teachers in education has been overlooked in the past to the detriment of students of all ages This relationship can have a huge impact on the success of learners and must be examined further to ensure students receive the best education possible The Research Anthology on Balancing Family Teacher Partnerships for Student Success examines the best practices and challenges of establishing and maintaining a successful relationship between teachers and families It discusses the history of this relationship as well as future directions that must be considered Covering key topics such as early childhood education work habits assessments and mentorship this major reference work is ideal for administrators principals industry professionals researchers scholars academicians practitioners instructors and students **Getting to the Common Core** Sharon L. Spencer,Sandra Vavra,2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually

focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research

Math Word Problems Anita Harnadek,1996-03 *Formative Assessment* Margaret Heritage,2021-08-18 Offers specific examples of the formative assessment process in action in a range of subject areas Addresses the place of formative assessment within the broader assessment picture Discusses and gives examples of effective feedback as an essential part of formative assessment Shows how to engage students in self assessment and self management so they can participate in keeping their learning on course Examines how educators and school leaders can support classroom implementation of formative assessment

Creating Vibrant Art Lesson Plans Kristin Baxter,2019-04-05 Writing lesson plans is often considered busywork but it can be a useful path for discovering what s important about artmaking and teaching This book shows teachers how to slow down breathe and linger over the process of unit and lesson plan writing to uncover how much this process can support them professionally creatively and personally The user friendly text offers guidance for selecting an art project for the unit and then zooms into the nitty gritty of specific lesson plans including how to identify materials for a project and how to construct classroom dialogue to help students develop ideas for their artwork The text also considers standards assessments and extensions to other subject areas Featuring accessible language clear definitions practical examples and self reflection prompts this unique resource will help pre and inservice teachers create lesson plans that are useful to their specific contexts and methods of teaching If you happen to be feeling weary frustrated or uninspired this book sparks imagination fuels hope and gives you theories to support what you know needs to be done From the Foreword by P Bruce Uhrmacher Christy McConnell Moroye and Bradley Conrad educational researchers Baxter invites us to slow down and consider the lesson plan as a creative catalyst to inspire our own artmaking as well as a space to examine why and what we teach Lisa Hochtritt Maryland Institute College of Art An inspiring and playful resource that is much more rewarding than typical lesson planning It will surely spark your imagination with every flip of the page Hailey Adlard art educator Parkland School District PA

Eco-Mathematics Education Nataly Chesky,Jack Milgram,2021-10-18 Eco Mathematics Education strives to show how everyone can experience the embedded connection between mathematics and the natural world The authors sincere hope is that by doing so we can radically change the way we come to understand mathematics as well as humanity s place in the ecosystem The book hopes to accomplish this by providing in depth lesson plans and resources for educators and anyone interested in teaching and learning mathematics through an ecological aesthetic perspective All lessons are based on the inquiry method of teaching aligned to standards

incorporate art projects inspired by famous artists and utilize recycled and or natural materials as much as possible
