The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-09-05
This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

International Research, Policy and Practice in Teacher Education
Jean Murray, Anja Swennen, Clare Kosnik, 2018-12-17
This unique book is an important source of information for all of those who educate future teachers and those who participate in teacher education as students, researchers, educators and policymakers. The volume also contributes to the international development of higher quality and research led teacher education provision by providing clear evidence of policy impact. It draws on original research studies conducted across eight countries in North America, Europe and Australia to analyse the impact of teacher education policy initiatives on insiders in the fields including education students, teacher educators and mentors in schools. In achieving this, the various chapters in the book analyse the commonalities and differentiations in the many policy reforms in teacher education currently being implemented by national governments. The book reveals some of the hidden consequences of these recent reform efforts. It is also of use for leaders and policy makers in teacher education, providing them with insider perspectives from both theory and practice and making it possible for them to develop research informed decisions that take into account the voices of insiders. Few texts have considered international policy trends alongside the impact they have had on significant stakeholder groups inside teacher education. In redressing this omission, the book contributes to a better understanding of and improved practice of work in teacher education both pre and in service.

Time to Write John Sylvester Lofty, 2015-02-10
Analyzes interviews with students, teachers and administrators to develop a new set of literacies essential for student success in the digital age. To read John's work is to take on the role of a patient listener. A book like a piece of music is scored for time and I feel *Time to Write* is scored adagio. I believe that *Time to Write* can be read as a critique of the time chopping approach to education and an argument for presence for being fully open to experience for being there. To do good work we must enter something like

island time or what John calls existential time or what is sometimes called flow when we lose at least temporarily a sense of clock time from the Foreword by Thomas Newkirk Twenty five years ago John Sylvester Lofty studied the influence of cultural time values on students resistance to writing instruction in an isolated Maine fishing community For the new edition of Time to Write Lofty returned to the island to consider how social and educational developments in the intervening years may have affected both local culture and attitudes toward education Lofty discovered how the island time values that previously informed students literacy learning have been transformed by outside influences including technology social media and the influx of new residents from urban areas Building on the ethnographic findings of the original study the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication and those of school based literacy Lofty examines the new literacies now essential for students in a technologically connected world both those who aspire to continue the traditional island work of lobster fishing and for the many who now choose to pursue other careers and attend college on the mainland
