

MDAEMON ANTIVIRUS - INSTALLATION AND CONFIGURATION GUIDE

Where to download

Download the latest installation file here:

<http://www.atn.com/Download/Default.asp>

Installing MDaemon AntiVirus

Once downloaded, run the installation file on the MDaemon server.

Step through the installation – there aren't any options to worry about here.

Once the installation is complete, MDaemon will be restarted automatically to enable the AntiVirus plugin.

The first thing that the AntiVirus engine will do is to run an automated update to get the very latest database of virus signatures.

Configuring an AntiVirus update schedule

You can control how often it updates its virus signatures by right-clicking on the tray icon and selecting "Open update scheduler".

It is recommended to let AntiVirus check for updates every 24 hours. This should be enough, although many people choose to turn on the simple scheduling so that a check is done every 4 hours.

To control how often it updates its virus signatures select "Event Scheduling" from MDaemon's "Setup" menu and select the "AntiVirus Updates" tab. Here is a screenshot of our settings.

It's also highly recommended that you subscribe to the free "Urgent updates" feature.
