protection via the corresponding inhibitors Therefore the most common categorization is cathodic anodic and mixed type inhibitors taking into account which half reaction they suppress during corrosion phenomena The majority of the organic inhibitors are of mixed type and perform through chemisorption In order to update the field of the corrosion protection of metal and metal alloys with the use of organic inhibitors a Special Issue entitled Advances in Organic Corrosion Inhibitors and Protective Coatings is introduced This book gathers and reviews a collection of ten contributions nine articles and one review from authors from Europe Asia and Africa that were accepted for publication in this Special Issue of Applied Sciences
