Educating Scientists and Engineers for Academic and Non-Academic Career

Success James Speight, 2014-12-10 In an increasingly technological world the education of scientists and engineers has become an activity of growing importance *Educating Scientists and Engineers for Academic and Non Academic Career Success* focuses on the structure of the current educational system and describes the transformations needed to ensure the adequate education of future

Fostering Integrity in Research National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Science, Engineering, Medicine, and Public Policy, Committee on Responsible Science, 2018-01-13 The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity honesty openness fairness accountability and stewardship Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in every step of the research process Understanding the dynamics that support or distort practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge The 1992 report *Responsible Science Ensuring the Integrity of the Research Process* evaluated issues related to scientific responsibility and the conduct of research It provided a valuable service in describing and analyzing a very complicated set of issues and has served as a crucial basis for thinking about research integrity for more than two decades However as experience has accumulated with various forms of research misconduct detrimental research practices and other forms of misconduct as subsequent empirical research has revealed more about the nature of scientific misconduct and because technological and social changes have altered the environment in which science is conducted it is clear that the framework established more than two decades ago needs to be updated *Responsible Science* served as a valuable benchmark to set the context for this most recent analysis and to help guide the committee's thought process *Fostering Integrity in Research* identifies best practices in research and recommends practical options for discouraging and addressing research misconduct and detrimental research practices

The Square

Kilometre Array Richard T. Schilizzi, Ronald D. Ekers, Peter E. Dewdney, Philip Crosby, 2024-06-21 The Square Kilometre Array SKA is a grand vision project to build the most sensitive radio telescope in the world This open access book tells the

story of its development a story of transformational science innovative engineering and global collaboration Its journey has been long and complex reflecting the many issues faced in creating an affordable design choosing a site and developing a viable global organisation starting from a simple working group of far sighted and persistent astronomers in 1993 The book begins with the emergence of the SKA concept and the first working group It traces the development of global scientific and engineering collaborations and ever more comprehensive governance structures for the SKA the involvement and roles of funding agencies and governments and the long political site selection process This occurred alongside efforts to overcome technical barriers and the difficult process of selecting technology It follows these themes up to the point in 2012 when the project had just transitioned from a collaboration to a legal entity and the dual site decision was made a pivotal moment when it was clear the SKA arrays would be built The book is based on the authors personal experience at the leading edge of the project over many years as well as access to hitherto unpublished material from project archives interviews and presentations from many of the key players at a specially convened conference It has a Foreword written by John Womersley former Chair of the Agencies SKA Group and SKA Organisation Board The book is intended for an audience ranging from funding agencies and governments involved in major research infrastructures to historians of science and professional researchers studying mega projects to the astronomy and physics communities in general and interested lay readers

Spacecraft Dynamics and Control Enrico Canuto, Carlo Novara, Donato Carlucci, Carlos Perez-Montenegro, Luca Massotti, 2018-03-08 Spacecraft Dynamics and Control The Embedded Model Control Approach provides a uniform and systematic way of approaching space engineering control problems from the standpoint of model based control using state space equations as the key paradigm for simulation design and implementation The book introduces the Embedded Model Control methodology for the design and implementation of attitude and orbit control systems The logic architecture is organized around the embedded model of the spacecraft and its surrounding environment The model is compelled to include disturbance dynamics as a repository of the uncertainty that the control law must reject to meet attitude and orbit requirements within the uncertainty class The source of the real time uncertainty estimation prediction is the model error signal as it encodes the residual discrepancies between spacecraft measurements and model output The embedded model and the uncertainty estimation feedback noise estimator in the book constitute the state predictor feeding the control law Asymptotic pole placement exploiting the asymptotes of closed loop transfer functions is the way to design and tune feedback loops around the embedded model state predictor control law reference generator The design versus the uncertainty class is driven by analytic stability and performance inequalities The method is applied to several attitude and orbit control problems The book begins with an extensive introduction to attitude geometry and algebra and ends with the core themes state space dynamics and Embedded Model Control Fundamentals of orbit attitude and environment dynamics are treated giving emphasis to state space formulation disturbance dynamics state feedback and prediction closed loop stability Sensors and

actuators are treated giving emphasis to their dynamics and modelling of measurement errors Numerical tables are included and their data employed for numerical simulations Orbit and attitude control problems of the European GOCE mission are the inspiration of numerical exercises and simulations The suite of the attitude control modes of a GOCE like mission is designed and simulated around the so called mission state predictor Solved and unsolved exercises are included within the text and not separated at the end of chapters for better understanding training and application Simulated results and their graphical plots are developed through MATLAB Simulink code

A Trust Betrayed Mike Wagner,2025-05-01 While the big bad corporation has often been the offender in many of the world s greatest environmental disasters in the case of the mass poisoning at Camp Lejeune the culprit is a revered institution the US Marine Corps For two decades now revelations have steadily emerged about pervasive contamination associated clusters of illness and death among the Marine families stationed there and military stonewalling and failure to act Mike Wagner s chilling investigation creates a suspenseful narrative from the individual stories scientific evidence and smoldering sense of betrayal among those whose motto is undying fidelity He also raises far reaching and ominous questions about widespread contamination on US military bases worldwide

The Design of Aircraft Landing Gear Robert Kyle Schmidt,2021-02-18 The aircraft landing gear and its associated systems represent a compelling design challenge simultaneously a system a structure and a machine it supports the aircraft on the ground absorbs landing and braking energy permits maneuvering and retracts to minimize aircraft drag Yet as it is not required during flight it also represents dead weight and significant effort must be made to minimize its total mass The Design of Aircraft Landing Gear written by R Kyle Schmidt PE B A Sc Mechanical Engineering M Sc Safety and Aircraft Accident Investigation Chairman of the SAE A 5 Committee on Aircraft Landing Gear is designed to guide the reader through the key principles of landing system design and to provide additional references when available Many problems which must be confronted have already been addressed by others in the past but the information is not known or shared leading to the observation that there are few new problems but many new people The Design of Aircraft Landing Gear is intended to share much of the existing information and provide avenues for further exploration The design of an aircraft and its associated systems including the landing system involves iterative loops as the impact of each modification to a system or component is evaluated against the whole It is rare to find that the lightest possible landing gear represents the best solution for the aircraft the lightest landing gear may require attachment structures which don t exist and which would require significant weight and compromise on the part of the airframe structure design With those requirements and compromises in mind The Design of Aircraft Landing Gear starts with the study of airfield compatibility aircraft stability on the ground the correct choice of tires followed by discussion of brakes wheels and brake control systems Various landing gear architectures are investigated together with the details of shock absorber designs Retraction kinematics and mechanisms are studied as well as possible actuation approaches Detailed information on the various hydraulic and electric services commonly found on

aircraft and system elements such as dressings lighting and steering are also reviewed Detail design points the process of analysis and a review of the relevant requirements and regulations round out the book content The Design of Aircraft Landing Gear is a landmark work in the industry and a must read for any engineer interested in updating specific skills and students preparing for an exciting career

Iran's Rocket and Missile Forces and Strategic Options Anthony H.

Cordesman,2015-01-23 Iran s rocket and missile forces serve a wide range of Iranian strategic objectives These forces range from relatively short range artillery rockets that support its ground forces and limit the need for close air support to long range missiles that can reach any target in the region and the development of booster systems that might give Iran the ability to strike at targets throughout Europe and even in the United States Iran s forces and systems are steadily evolving While the lethality of most current systems is limited by a reliance on conventional warheads poor accuracy and uncertain reliability Iran is developing steadily improved guidance systems attempting to improve the lethality of its conventional warheads and has at least studied arming its missiles with nuclear warheads

This Changes Everything Naomi Klein,2014-09-16 The most important book yet from the author of the international bestseller *The Shock Doctrine* a brilliant explanation of why the climate crisis challenges us to abandon the core free market ideology of our time restructure the global economy and remake our political systems In short either we embrace radical change ourselves or radical changes will be visited upon our physical world The status quo is no longer an option In *This Changes Everything* Naomi Klein argues that climate change isn t just another issue to be neatly filed between taxes and health care It s an alarm that calls us to fix an economic system that is already failing us in many ways Klein meticulously builds the case for how massively reducing our greenhouse emissions is our best chance to simultaneously reduce gaping inequalities re imagine our

broken democracies and rebuild our gutted local economies She exposes the ideological desperation of the climate change deniers the messianic delusions of the would be geoengineers and the tragic defeatism of too many mainstream green initiatives And she demonstrates precisely why the market has not and cannot fix the climate crisis but will instead make things worse with ever more extreme and ecologically damaging extraction methods accompanied by rampant disaster capitalism Klein argues that the changes to our relationship with nature and one another that are required to respond to the climate crisis humanely should not be viewed as grim penance but rather as a kind of gift a catalyst to transform broken economic and cultural priorities and to heal long festering historical wounds And she documents the inspiring movements that have already begun this process communities that are not just refusing to be sites of further fossil fuel extraction but are building the next regeneration based economies right now Can we pull off these changes in time Nothing is certain Nothing except that climate change changes everything And for a very brief time the nature of that change is still up to us

Indigenous Rights and Water Resource Management Katie O'Bryan, 2018-10-26 In an era of climate change the need to manage our water resources effectively for future generations has become an increasingly significant challenge Indigenous management practices have been successfully used to manage inland water systems around the world for thousands of years and Indigenous people have been calling for a greater role in the management of water resources As First Peoples and as holders of important knowledge of sustainable water management practices they regard themselves as custodians and rights holders deserving of a meaningful role in decision making This book argues that a key

albeit not the only means of ensuring appropriate participation in decision making about water management is for such participation to be legislatively mandated To this end the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation consultation and representation in the water management landscape **Maritime Technology and Engineering** Carlos Guedes Soares,T.A.
