Diversity in Deaf Education Marc Marschark, Venetta Lampropoulou, Emmanouil K. Skordilis, 2016-05-31 Deaf children are not hearing children who can't hear. Beyond any specific effects of hearing loss as a group they are far more diverse than hearing peers. Lack of full access to language, incidental learning and social interactions as well as the possibility of secondary disabilities means that deaf learners face a variety of challenges in academic domains. Technological innovations such as digital hearing aids and cochlear implants have improved hearing and the possibility of spoken language for many deaf learners but parents, teachers and other professionals are just now coming to recognize that there are cognitive, experiential and social/emotional differences between deaf and hearing students likely to affect academic outcomes. Sign languages and schools and programs for deaf learners thus remain an important part of the continuum of services needed for this diverse population. Understanding such diversity and determining ways in which to accommodate them must become a top priority in educating deaf learners. Through the participation of an international interdisciplinary set of scholars, Diversity in Deaf Education takes a broad view of learning and academic progress considering the whole child in the context of the families, languages, educational settings in which they are immersed. In adopting this perspective, the complexities and commonalities in the social, emotional, cognitive and linguistic mosaic of which the deaf child is a part are captured. It is only through such a holistic consideration of diverse children developing within diverse settings that we can understand their academic potentials.

SignGram Blueprint Josep Quer, Carlo Cecchetto, Caterina Donati, Carlo Geraci, Meltem Keleşir, Roland Pfau, Markus Steinbach, 2017-11-20 We gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union. Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis. In general, comprehensive grammars are a rarity. The SignGram Blueprint is an innovative tool for the grammar writer: a full-fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards. The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from Theoretical Linguistics. It consists of two main parts running in parallel: the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information, definitions, methodological caveats, representative examples, tests, pointers to elicitation materials and bibliographical references. The areas covered are Phonology, Morphology, Lexicon, Syntax and Meaning. The Manual is endowed with hyperlinks that connect information across the work and with a pop-up glossary. The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity.

It is aimed at taking stock of the successes, challenges and achievements during this journey of making

education inclusive and equitable It responds to the educational needs of learners at all levels regardless of their diverse needs such as disability gender socio economic status race ethnicity and language background This book furthers the understanding and conceptualization of the notion of inclusion in education and explores the challenges experienced during the operationalization and implementation of the process It extends debates spawned by international and national policy mandates that sought to transcend exclusionary educational practices in order to realize inclusive societies and by implication inclusive classrooms It offers a comprehensive conceptual framework for inclusive education in the Southern African context while drawing parallels from the regional and international experience This book can be used as a reference or critical reading for scholars and researchers in the field of inclusive education It will empower practitioners administrators teachers and school leaders curriculum developers and planners as well as policy makers with knowledge about theory and practice regarding inclusive education in the Southern African schooling system      *The Oxford Handbook of Deaf Studies in Learning and Cognition* Marc Marschark, Harry Knoors, 2020-04-15 In recent years the intersection of cognitive psychology developmental psychology and neuroscience with regard to deaf individuals has received increasing attention from a variety of academic and educational audiences Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn how signed languages and spoken languages might affect different aspects of cognition and cognitive development and the ways in which hearing loss influences how the brain processes and retains information There are now a number of preliminary answers to these questions but there has been no single forum in which research into learning and cognition is brought together The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum focusing exclusively on learning cognition and cognitive development from theoretical psychological biological linguistic social emotional and educational perspectives Each chapter includes state of the art research conducted and reviewed by international experts in the area Drawing this research together this volume allows for a synergy of ideas that possesses the potential to move research theory and practice forward      *A Matter of Complexity* Roland Pfau, Markus Steinbach, Annika Herrmann, 2016-03-07 Since natural languages exist in two different modalities the visual gestural modality of sign languages and the auditory oral modality of spoken languages it is obvious that all fields of research in modern linguistics will benefit from research on sign languages Although previous studies have provided important insights into a wide range of phenomena of sign languages there are still many aspects of sign languages that have not yet been investigated thoroughly The structure of subordinated clauses is a case in point The study of these complex syntactic structures in the visual gestural modality adds to our understanding of linguistic variation in the domain of subordination Moreover it offers new empirical and theoretical evidence concerning possible structures and functions of subordination in natural languages And last but not least it answers the question to what extent the corresponding morphosyntactic and prosodic strategies depend on the modality of articulation and perception This volume represents the

first collection of papers by leading experts in the field investigating topics that go beyond the analysis of simple clauses It thus contributes in innovative ways to recent debates about syntax prosody semantics discourse structure and information structure and their complex interrelation Sign Language in Action Jemina Napier,Lorraine Leeson,2016-01-26 This book defines the notion of applied sign linguistics by drawing on data from projects that have explored sign language in action in various domains The book gives professionals working with sign languages signed language teachers and students research students and their supervisors authoritative access to current ideas and practice *Sign Language Research Sixty Years Later: Current and Future Perspectives* Valentina Cuccio,Erin Wilkinson,Brigitte Garcia,Adam Schembri,Erin Moriarty,Sabina Fontana,2022-11-14 Health Informatics and Medical Systems and Biomedical Engineering Abeer Alsadoon,Farzan Shenavarmasouleh,Soheyla Amirian,Farid Ghareh Mohammadi,Hamid R.
