Translation/re-Creation Duncan Poupard,2021-11-29 This book is a study of European language translations of Naxi ritual manuscripts the ritual literature of a small ethnic group living in southwest China s Yunnan Province The author discusses the translations into European languages in English French and German from the late nineteenth century to the second half of the twentieth century revealing a history of fragmentary yet interconnected translation efforts in the West By exploring this network he shows how translation can be understood as a metonymic recreation of textual worlds As Naxi manuscripts are semi oral texts representing an oral formulaic tradition their translation involves a metonymic relay of partial incorporations from manuscript image to reading spoken language Therefore the book engages in a series of textual excavations to uncover the previously occluded contemporaneous readings that would have led to the translations we can consult today particularly in an attempt to understand how the Naxi literature came to be part of Ezra Pound s Cantos Scholars in the field of ethnic minority literature in China and translation studies will find this book beneficial and it will make new contributions to comparative literature between the East and West *MLN* ,1974 *MLN* pioneered the introduction of contemporary continental criticism into American scholarship Critical studies in the modern languages Italian Hispanic German French and recent work in comparative literature are the basis for articles and notes in *MLN* Four single language issues and one comparative literature issue are published each year

Daoism Ronnie L. Littlejohn,2009-03-16 The way that can be told is not the eternal Way the name that can be named is not the eternal Name So begins the first verse of the mysterious Dao De Jing foundation text of the ancient Chinese religion of Daoism Often attributed to semi mythical sage Laozi the origins of this enigmatic document which probably came into being in the third century BCE are actually unknown But the tenets of Daoism laid down in the Dao De Jing and in later texts like the Yi Jing or Book of Changes continue to exert considerable fascination particularly in the West where in recent years they have been popularized by writers such as the novelist Ursula K LeGuin In this fresh and engaging introduction to Daoism Ronnie L Littlejohn discusses the central facets of a tradition which can sometimes seem as elusive as the slippery notion of Dao itself The author shows that fundamental to Daoism is the notion of Wu wei or non action a paradoxical idea emphasizing alignment of the self with the harmony of the universe a universe in continual flux and change This flux is expressed by the famous symbol of Dao the taiji representing yin and yang eternally correlating in the form of a harmonious circle Exploring the great subtleties of this ancient religion Littlejohn traces its development and encounters with Buddhism its expression in art and literature its fight for survival during the Cultural Revolution and its manifestations in modern day China and beyond **macOS High Sierra:**
