

Cell Division

Answer Key

Vocabulary: cell division, centriole, centromere, chromatid, chromatin, chromosome, cytokinesis, DNA, interphase, mitosis

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

[Note: The purpose of these questions is to activate prior knowledge and get students thinking. Students are not expected to know the answers to the Prior Knowledge Questions.]

1. Cells reproduce by splitting in half, a process called **cell division**. What do cells need to do between divisions to make sure that they don't just get smaller and smaller?

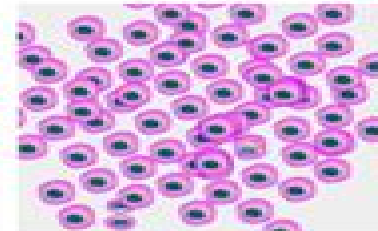

A cell must grow.

2. The genetic information of a cell is carried in its **DNA** (short for deoxyribonucleic acid). What do cells need to do between divisions to make sure that a full set of DNA gets passed on to each daughter cell?

The DNA must be copied so there is a full set of DNA to pass on to each daughter cell.

Gizmo Warm-up

On the SIMULATION pane of the *Cell Division Gizmo™*, check that the **Cycle Length** is set to 12 hours. Click **Play** (▶), observe until the maximum number of cells is shown, and then click **Pause** (⏸).

1. Look at the cells. Do they all look the same? *No*
2. Cells that are in the process of dividing are said to be in **mitosis** or **cytokinesis**. Cells that are not dividing are in **interphase**.

Check the **Magnify** box and move the cursor over the cells.

- A. Of the 100 cells shown, how many are in the process of dividing?

Answers will vary (~5-20).

- B. Select the BAR CHART tab, and turn on **Show numerical values**. How many cells are in the interphase stage of their life cycle? *Answers will vary (~80-95).*

- C. Based on these two observations, would you say that a cell spends most of its life cycle in interphase or in mitosis/cytokinesis? *Interphase*

Emerging Technologies for the Classroom Chrystalla Mouza, Nancy Lavigne, 2012-11-07 This book provides contemporary examples of the ways in which educators can use digital technologies to create effective learning environments that support improved learning and instruction These examples are guided by multiple conceptual and methodological traditions evolving from the learning sciences and instructional technology communities as well as other communities doing important work on learning technologies In particular the book provides examples of technology innovations and the ways in which educators can use them to foster deep understanding collaboration creativity invention and reflection Additional examples demonstrate the ways in which emerging mobile and networked technologies can help extend student learning beyond the confines of the classroom wall and support student directed learning and new media literacies

Revolutionizing K-12 Blended Learning through the i2Flex Classroom Model Avgerinou, Maria D., Gialamas, Stefanos P., 2016-06-20 Blended learning has gained significant attention recently by educational leaders practitioners and researchers i Flex a variation of blended learning is based on the premise that certain non interactive teaching activities such as lecturing can take place by students without teachers direct involvement Classroom time can then be used for educational activities that fully exploit teacher student and student student interactions allowing for meaningful personalized feedback and scaffolding on demand Revolutionizing K 12 Blended Learning through the i Flex Classroom Model presents a well rounded discussion on the i Flex model highlighting methods for K 12 course design delivery and evaluation in addition to teacher performance assessment in a blended i Flex environment Emphasizing new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers this publication is an essential reference source for pre service and in service teachers researchers administrators and educational technology developers

Learning by Mistake Emma Chiappetta, 2025-07-31 Mistakes aren't something to fear they're a powerful catalyst for learning When students experience mistakes as opportunities rather than obstacles they participate more think more creatively and develop resilience that extends far beyond the classroom In Learning by Mistake veteran educator Emma Chiappetta reveals how mistakes prime the brain for deeper learning Drawing on current neuroscience research and her own classroom experience Chiappetta provides 12 practical field tested strategies that help build a positive mistake culture where errors are valued stepping stones to success This accessible guide shows you how to Create classroom environments where students feel safe to take intellectual risks Phrase and deliver feedback in a way that builds student confidence Design activities that normalize mistake making and turn errors into learning opportunities Help students analyze their mistakes and develop metacognitive skills Transform assessment practices to celebrate growth rather than punish imperfection From wrong answers only icebreakers to collaborative mistake analysis mistake meetings and mistake journals these ready to implement strategies work across all grade levels and subject areas Whether you're working with apprehensive students to

deepen their learning or simply looking to create a more supportive classroom culture Learning by Mistake provides the tools you need to turn mistake anxiety into curiosity and growth *The Science Teacher* ,1997 SCC Library has 1964 cur
