Student Exploration: Rock Cycle

Objectives Students will be able to: describe the rock cycle, including the processes of weathering, erosion, sedimentation, lithification, metamorphism, and melting, and explain how these processes change the composition and structure of rocks.

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. What happens to **rocks** after a long time? (Answers will vary.) Is it the process of weathering? And what is weathering? (Weathering breaks the surface of a rock.)
2. How does rock change **over** time? (The composition of the rock material changes, and the shape of the rock changes.)
3. The temperature from your computer is very hot. Imagine what it's like **underground** near the Earth's center. What do you think will happen? (The rock will melt or become liquid.)

They will become molten lava again.

Gizmo Warm-up

Open the Rock Cycle Gizmo. The diagram shows the different types of rocks and how they change over time. The diagram shows the different types of rocks and how they change over time. The diagram shows the different types of rocks and how they change over time.

1. What type of rocks are shown? (Igneous, sedimentary, and metamorphic rocks.)
2. **Magma** is molten (liquid) rock under Earth's surface. Based on the image, how do you think magma becomes **igneous** **rocks**? (The magma cools and solidifies to form igneous rocks.)
3. How **igneous** **rocks** could become **sedimentary** rocks? (The igneous rocks weather and erode, and the sediments are buried and lithified.)

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Rocks and Minerals, 2011 *What Are They Thinking?* Page Keeley, 2014-04-01 Children are continually developing ideas and explanations about their natural world. Some of these ideas are consistent with the science children are taught; others differ significantly from scientific explanations. Many of these ideas will follow students into adulthood if they remain hidden from the teacher and unresolved. The challenge for teachers is to find ways to elicit these ideas and then use appropriate strategies to move students' learning forward. Page Keeley, author of the bestselling NSTA Press series *Uncovering Student Ideas in Science*. You don't have to become a mind reader to understand the ideas young students bring to science class. This collection will help you draw out and then recognize what students know or think they know about the natural world. *What Are They Thinking?* is a compendium of 30 Formative Assessment Probes, columns from NSTA's elementary journal *Science and Children*. Each chapter provides a sample formative assessment probe, a set of interesting questions that root out commonly held, often mistaken ideas. Geared to elementary students, probe topics range from why you can see the Moon in the daytime to where water goes when it evaporates to what is or isn't a rock. Your students' answers to each probe will help you take a step back and figure out how to guide them from where they are conceptually to where they need to be. Accompanying teacher notes, easy-to-grasp explanations, and advice that tell you how to encourage evidence-based discussion and then monitor students' understanding. A bonus feature: a set of study group questions written especially for this compendium by award-winning author Page Keeley. So forget about acquiring psychic powers. Instead, turn to *What Are They Thinking?* to transform both your teaching and your students' learning about science.
