Handbook of Fabrication Processes Orville D. Lascoe, 1988-01-01 This book is a valuable reference for the materials engineer, the manufacturing engineer or the technician who wants a practical description of fabrication processes. Sheet metal fabrication processes are receiving greater attention and are more widely applied by the metalworking industries because of the savings in cost and material. This book compiles the proven theories and operations tested in industrial applications. Focus is on the non-chip producing machine tools that shape metals by shearing, pressing and forming. New materials and advances in tooling are discussed as well as the need for applied science in optimizing the operations for sheet metal fabrication processes. Examples of each of these forming processes are given and the text also describes the mechanics of each process so that a logical decision can be made concerning the best operation for a specific result. The volume is divided into five sections, each consisting of a series of chapters. The major sections cover fabricating presses, stamping and forming operations, plastics for tooling, structural shapes and non-traditional machining. A section on definitions and terminology is also included. The book is

profusely illustrated and indexed making it easy to find references to specific forming topics Written by an expert with 40 years of hands on practical engineering experience this Handbook contains the essential information you need on forming methods machinery and the response of materials *Handbook of Composite Fabrication* Güneri Akovali,2001 This volume is a concise reference book for someone who has just started working in the composites field as well as for technologists already active in the area The chapters in this handbook have been written by experts in their fields and so the information on a particular subject area can be regarded as state of the art Each chapter is fully referenced illustrated and includes case studies and applications of polymer composite fabrications **Training Manual for Structural Fabrication**
