Processes Jingzheng Ren, Yufei Wang, Chang He, 2020-06-30 Towards Sustainable Chemical Processes describes a comprehensive framework for sustainability assessment design and the processes optimization of chemical engineering. Beginning with the analysis and assessment in the early stage of chemical products, initiating this book focuses on the combination of science sustainability and process system engineering involving mathematical models, industrial ecology, circular economy, energy planning, process integration, and sustainability engineering. All chapters throughout answered two fundamental questions in depth: 1. what tools and models are available to be used to assess and design sustainable chemical processes? 2. what the core theories and concepts are to get into the sustainable chemical process fields? Therefore, Towards Sustainable Chemical Processes is an indispensable guide for chemical engineers, researchers, students, practitioners, and consultants in sustainability related area. Provides innovative, novel, and comprehensive methods and models for sustainability assessment design and optimization and synthesis and integration of chemical engineering processes. Combines sustainability science with process system engineering. Integrates mathematical models, industrial ecology, circular economy, energy planning, process integration, and sustainability engineering. Includes new case studies related to renewable energy resource management, process synthesis, and process integration. Advances and Trends in Artificial Intelligence: Theory and Applications Hamido Fujita, Yutaka Watanobe, Moonis Ali, Yinglin Wang, 2025-08-01 This book constitutes the refereed proceedings of the 38th International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems on Advances and Trends in Artificial Intelligence IEA AIE 2025 held in Kitakyushu, Japan, in July 1-4, 2025. The 80 full papers and 9 short papers included in this book were carefully reviewed and selected from 130 submissions. They focus on the following topical sections: Part I: Reinforcement Learning, Optimization, Natural Language Processing, Multi-Agent Machine Learning, and Decision Making; Knowledge Representation; Data Engineering; Large Language Model; Computer Vision; Part II: Robotics; Education; Cyber Security; Healthcare and Medical Applications; Advanced Applied Intelligence; Methodologies and Applications; Intelligent Systems and e Applications; Industrial and Engineering Applications. **Facilities Planning and Design** Alberto Garcia-Diaz, J. MacGregor Smith (Deceased), 2024-04-26 This updated expanded second edition includes new software methodologies and algorithms providing students with a more comprehensive knowledge base in addition to facilitating and making the project component of the textbook more efficient and effective. It further increases emphasis on manufacturing. Retaining its class-tested pedagogy, the book is concerned with the principles of facilities planning and their application to service business and product manufacturing operations. Equipping undergraduate students with the fundamentals of facilities planning, design, location, and material handling, especially as they apply to industrial manufacturing facilities, the book is ideal for a range of university settings offering courses on facilities planning. *Air Force Engineering & Services Quarterly*, 1979 Intelligent Systems Design and Applications Ajith Abraham, Anu Bajaj, Thomas Hanne, 2024-07-22 This book highlights recent research on intelligent systems and machine learning-based solutions. It

presents 46 selected papers focused on Industrial Applications from the 23rd International Conference on Intelligent Systems Design and Applications ISDA 2023 which was held in 5 different cities namely Olten Switzerland Porto Portugal Kaunas Lithuania Greater Noida India Kochi India and in online mode The ISDA is a premier conference in the field of artificial intelligence and the latest installment brought together researchers engineers and practitioners whose work involves intelligent systems and their applications in industry ISDA 2023 had contributions by authors from 64 countries This book offers a valuable reference guide for all industrial specialists scientists academicians researchers students and practitioners in the field of artificial intelligence and industrial applications **Ebola and Marburg treatment centres** World Health Organization, 2024-07-25 This manual addresses the design and construction of healthcare facilities supporting the response to Ebola and Marburg E M disease outbreaks particularly in treatment centres TCs It provides technical guidance minimum requirements practical tools and layout examples and references for planning designing building and operating healthcare facilities TCs and others to respond to E M disease outbreaks in low and middle income contexts and resource limited settings The manual complements other World Health Organization WHO literature and contributes to the standardization of facility design and operation for safe and humane care and treatment of patients
