

Four Terms (Grouping)

Step 1: Group the first two terms together + the last two terms together

Step 2: Factor out the GCF for each binomial

Step 3: The GCF from each binomial will become one factor + remaining binomial will be the other factor

Examples

$$\begin{aligned} 1. & (x^2y + 3x^3) - (7y^2 - 21y) \\ & x^2(y + 3) - 7y(y - 3) \\ & (y + 3)(x^2 - 7y) \end{aligned}$$

$$\begin{aligned} 2. & (4r^2s - 8rs) - (3r + 6) \\ & 4rs(r - 2) - 3(r - 2) \\ & (r - 2)(4rs - 3) \end{aligned}$$

$$\begin{aligned} 3. & (a^3 + a^2b) + (ab + b^2) \\ & a^2(a + b) + b(a + b) \\ & (a + b)(a^2 + b) \end{aligned}$$

Factoring Polynomials Project:

Lattice Basis Reduction Murray R. Bremner, 2011-08-12 First developed in the early 1980s by Lenstra Lenstra and Lov sz the LLL algorithm was originally used to provide a polynomial time algorithm for factoring polynomials with rational coefficients It very quickly became an essential tool in integer linear programming problems and was later adapted for use in cryptanalysis This book provides an introduction to the theory and applications of lattice basis reduction and the LLL algorithm With numerous examples and suggested exercises the text discusses various applications of lattice basis reduction to cryptography number theory polynomial factorization and matrix canonical forms

work of significant importance this book will be essential reading for all students on the second or final year of a mathematics degree or on courses with a high mathematical content for example physics and engineering Projects in Scientific Computation Richard E. Crandall,2000-06-22 This interdisciplinary book provides a compendium of projects plus numerous example programs for readers to study and explore Designed for advanced undergraduates or graduates of science mathematics and engineering who will deal with scientific computation in their future studies and research it also contains new and useful reference materials for researchers The problem sets range from the tutorial to exploratory and at times to the impossible The projects were collected from research results and computational dilemmas during the authors tenure as Chief Scientist at NeXT Computer and from his lectures at Reed College The content assumes familiarity with such college topics as calculus differential equations and at least elementary programming Each project focuses on computation theory graphics or a combination of these and is designed with an estimated level of difficulty The support code for each takes the form of either C or Mathematica and is included in the appendix and on the bundled diskette The algorithms are clearly laid out within the projects such that the book may be used with other symbolic numerical and algebraic manipulation products

Taking College Teaching Seriously - Pedagogy Matters! Gail O. Mellow,Diana D. Woolis,Marisa Klages-Bombich,Susan Restler,2023-07-03 College teaching is not rocket science it s much much harder Diana Laurillard

University of London College faculty both adjunct and full time stand with their students at the coalface of learning wishing for more to succeed and disappointed at how illusory academic success is for so many. Among the array of investments colleges are making to improve student outcomes from predictive data analysis to enhanced advising too little attention is paid to supporting faculty. Yet the impact of teacher and teaching on student learning is incontrovertible. Taking College Teaching Seriously: Pedagogy Matters stands against the tide celebrating the incredible work faculty members do each day and challenging them to expand their capacity to present their content expertise effectively. This book presents a model of embedded professional development which capitalizes on the affordances of technology to enable groups of faculty to examine their practice in a non-evaluative context but with a clear focus on improvement. The core of the work involves individual reflection and the design provides for an accessible way to see into the classrooms of discipline peers. Most importantly the Taking College Teaching Seriously experience is not an intense one-shot but rather a structured opportunity for a faculty member to examine and adapt practice over time and to assess the impact of changes on student learning. Faculty who have participated in the Taking College Teaching Seriously experience found it to be transformative. English Professor Kentucky: Participating in the work this year has helped me to be more reflective in every single action. I constantly analyze how each session went; it gave me the tools to think about every minute detail of a classroom. Adjunct Math Professor Mississippi: Speaking as an adjunct I have valued the chance to share my teaching and get ideas from others. I can honestly say that this experience has been a lifeline of sorts this year. In a magic wand instructional setting I'd wish for the kind of honest, respectful and professionally challenging discussions we have in Classroom Notebook at weekly staff meetings. Classroom Notebook is the Taking College Teaching Seriously online platform. Math Professor NJ: I think the continual self-evaluation and reflection allowed us to work together to brainstorm improvements and positive tweaks to be more purposeful in our classrooms as opposed to just randomly reaching in the dark for ideas and techniques in HOPE of success. Taking College Teaching Seriously: Pedagogy Matters breaks new ground in professional development. Each faculty member is at the center of the learning experience, stimulated and supported by peers working in similar contexts. They share a desire to see more students learn deeply and find that honing their skill at adapting to the learning needs of specific classes and students allows them to realize this goal. Uniquely Taking College Teaching Seriously illuminates the link between faculty teaching expertise and improving student outcomes. The introduction to the book examines the challenges facing faculty in higher education today and reviews the literature on teaching and learning. Chapter 1 looks at the analytical foundations for all of the model's elements from adult learning theory to communities of practice and Chapter 2 presents the model's theory of change. Chapter 3 describes the model in detail and Chapters 4 and 5 concern the infrastructure of the faculty collaborative community focusing on both its interpersonal and technological dimensions. The book concludes in Chapter 6 with an assessment of the value of this approach to professional development and a call to action for faculty member engagement in

this important work so essential to both professional passion and mandate *Standards-based School Mathematics Curricula* Sharon L. Senk, Denisse R. Thompson, 2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research Interactive Theorem Proving Jeremy Avigad, Assia Mahboubi, 2018-07-03 This book constitutes the refereed proceedings of the 9th International Conference on Interactive Theorem Proving ITP 2018 held in Oxford UK in July 2018 The 32 full papers and 5 short papers presented were carefully reviewed and selected from 65 submissions The papers feature research in the area of logical frameworks and interactive proof assistants The topics include theoretical foundations and implementation aspects of the technology as well as applications to verifying hardware and software systems to ensure their safety and security and applications to the formal verification of mathematical results Chapters 2 10 26 29 30 and 37 are available open access under
