

Genetics and Heredity: Odd One Out Worksheet

Name: Elly Thorsen

Date: _____

Hour: _____

Directions: Analyze each part of the circle. One of the parts will be different than the others. Shade the part of the circle that does not match. Using a complete sentence, explain how that part is different from the others. Answers must be science related and should show your understanding of genetics and heredity.

Example

History is the odd one out because it is not a type of science like the others.

1

ff is the odd one out because it is recessive. All of the others have to do with the dominant allele.

A mixed-breed dog is the odd one out because it is not a purebred like the others.

2

3

A white fish with black spots is the odd one out because it shows codominance with both traits seen.

Qq is the odd one out because it is heterozygous and not homozygous like the others.

4

5

Having a fear of spiders is a learned trait and not an inherited trait, so it's the odd one out.

Homozygous is the odd one out because it refers to 2 of the same alleles for a trait - not 2 different alleles.
