Models of Modern Information Economy Alexander P. Sukhodolov, Elena G. Popkova, Tatiana N. Litvinova, 2018-10-29 This book determines the basic characteristics of an information economy and studies the main stages of information economy development. It offers a fresh perspective on the concept of modern information economy while providing a new theoretical model that supports the development of a well-balanced information economy. **Exemplars of Curriculum Theory** Arthur K. Ellis, 2014-01-09 This book crosses the divide between theoreticians and practitioners by demonstrating how curriculum theories and models are applied in classrooms today. It ties together broad educational theories such as progressivism, essentialism, perennialism, etc. curriculum models characterized as learner-centered, society-centered, or knowledge-centered, and exemplars of curriculum theories and models such as Reggio Emilia, Core Knowledge, the International Baccalaureate, etc.

Development Economics Shahrukh Rafi Khan, 2019-10-23 Following the 2007-2009 financial and economic crises, there has been an unprecedented demand among economics students for an alternative approach which offers a historical, institutional, and multidisciplinary treatment of the discipline. Economic development lends itself ideally to meet this demand, yet most undergraduate textbooks do not reflect this. This book will fill this gap, presenting all the core material needed to teach development economics in a one-semester course while also addressing the need for a new economics and offering flexibility to instructors. Rather than taking the typical approach of organizing by topic, the book uses theories and debates to guide its structure. This will allow students to see different perspectives on key development questions and therefore to understand more fully the contested nature of many key areas of development economics. The book can be used as a standalone textbook on development economics or to accompany a more traditional text. **Economic Psychology** Erich Kirchler, Erik Hoelzl, 2017-11-23 Economic Psychology is the only up-to-date English language textbook that provides a comprehensive overview of theoretical topics in economic psychology and their relevance in applied fields. Written by two leading psychologists, the book looks at how people make decisions on the use of scarce resources, in particular money, from a psychological perspective. Starting with decision making and lay theories as basic building blocks of economic behaviour, the authors go on to explore three major markets where economic behaviour occurs as an interaction between individuals and companies or institutions: consumer markets, labour markets, and financial markets, before considering the challenges of collective cooperation and economic prosperity. Featuring numerous applied examples throughout, each chapter also includes an overview, a summary, figures, key terms, student questions, and suggestions for further reading. This introduction is an essential resource for advanced undergraduate and postgraduate courses on economic psychology, behavioural economics, and social psychology. **Greece's (un) Competitive Capitalism and the Economic Crisis** Spyros

Sakellariopoulos, 2019-05-15 This book reviews the profound transformation to the Greek political economy in recent years and considers the reasons that have led to this transformation. Further, the author explores the social experimentation and

social diversity that evolved as a result of the Greek and international economic crises By challenging various assumptions made about the crisis the author sheds light on Greek social relations and the country's particular type of capitalist development This book will be of value to both economists and sociologists linking discussions about social class with economic political and institutional analyses
