Information Technology Usage in Metro Manila Public and Private Schools Maria Rodrigo, 2003-04-14 Both public and private schools in the Philippines are using information technology IT as a tool to improve teaching and learning While both government and private sector initiatives indicate national commitment to IT in education there is little up to date information on how extensively the Philippines are using computers and for what purposes The researcher s goals were to determine the extent to which Metro Manila public and private schools used IT and to determine how these results compared with analogous data on schools in other developing and developed countries The researcher gathered data with mail in questionnaires adapted from the International Association for the Evaluation of Educational Achievement IEA onsite visits and follow up telephone interviews The researcher also compared her results with those from IEA surveyed countries The researcher determined that actual

uses of IT did not meet schools curricular goals Although school officials wanted IT to individualize instruction promote active learning and improve student achievement in actual practice schools used computers to teach computer literacy productivity tools and programming In terms of infrastructure the researcher found that schools in Metro Manila had the poorest student to computer ratio in comparison to schools in IEA surveyed countries Metro Manila students access to peripherals was also poor Software selections were limited to productivity tools Students in Metro Manila primary schools like their counterparts in IEA surveyed countries had limited Internet access A comparison of results from public and private schools revealed that public and private schools shared many educational goals regarding the use of IT However the realization of these goals was uneven Private schools had been using computers for a greater number of years than public schools Private schools had lower student to computer and student to printer ratios They also had greater Internet access Furthermore private schools tended to expose their students to computers at practically all educational levels The study provided baseline data that was not previously available The researcher identifies the need for similar studies with greater geographic scope or of a longitudinal nature deeper investigations of curricular gaps or policy issues and the development of instructional software for Filipino specific subject areas

Lecture Notes in Computational

Intelligence and Decision Making Sergii Babichev,Volodymyr Lytvynenko,2021-07-22 This book is devoted to current problems of artificial and computational intelligence including decision making systems Collecting analysis and processing information are the current directions of modern computer science Development of new modern information and computer technologies for data analysis and processing in various fields of data mining and machine learning creates the conditions for increasing effectiveness of the information processing by both the decrease of time and the increase of accuracy of the data processing The book contains of 54 science papers which include the results of research concerning the current directions in the fields of data mining machine learning and decision making The papers are divided in terms of their topic into three sections The first section Analysis and Modeling of Complex Systems and Processes contains of 26 papers and the second section Theoretical and Applied Aspects of Decision Making Systems contains of 13 papers There are 15 papers in the third section Computational Intelligence and Inductive Modeling The book is focused to scientists and developers in the fields of data mining machine learning and decision making systems

Using Information Technology Stacey C. Sawyer,Brian K.

Williams,2005 Using Information Technology 6 e covers the fundamental computing concepts that are part of the digital age

including software hardware data people and procedures The text centers on educating today's technology consumer using themes of ethics the Internet and communications to demonstrate how the changing world of technology influences our lives and the decisions we make Resources in Education ,2001-10 *Managing Information Technology in a Global Economy* Information Resources Management Association. International Conference,2001 Today opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization Conversely failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources *Managing Information Technology in a Global Economy* is a valuable collection of papers that presents IT management perspectives from professionals around the world The papers introduce new ideas refine old ones and possess interesting scenarios to help the reader develop company sensitive management strategies Computerworld ,1997-06-02 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network **Smart Education Best Practices in Chinese Schools** Haijun Zeng,Jiahao Liu,Di Wu,Lijie Yue,2023-11-17 This book presents 28 practical case studies in detail and 49 case studies in brief The collection of these case studies focuses on one or more aspects of exploration and practice on the following topics smart campus and smart classroom resource construction and sharing new teaching mode comprehensive quality evaluation of students teacher professional development application of teaching platform and tool innovative application of online learning space collaborative education and school management and services The selection and evaluation criteria of the case studies on school practice mainly include concept and implementation effectiveness and characteristics innovation and demonstration and expression and structure This book helps readers gain a rich understanding of the diverse innovative implementation of smart education in Chinese schools and inspires smart education development in schools in other countries *Resources for Teaching Elementary School Science* National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution,1996-03-28 What activities might a teacher use to help children explore the life cycle of butterflies What does a science teacher need to conduct a leaf safari for students Where can children safely enjoy hands on experience with life in an estuary Selecting resources to teach elementary school science can be confusing and difficult but few decisions have greater impact on the effectiveness of science teaching Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science* A completely revised edition of the best selling resource guide *Science for Children Resources for Teachers* this new book is an annotated guide to hands on inquiry centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade Companion volumes for middle and high school are planned The guide annotates about 350 curriculum packages describing the activities involved and what students learn Each annotation lists recommended grade levels accompanying

materials and kits or suggested equipment and ordering information These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to Ask questions and find their own answers Experiment productively Develop patience persistence and confidence in their own ability to solve real problems The entries in the curriculum section are grouped by scientific area Life Science Earth Science Physical Science and Multidisciplinary and Applied Science and by type core materials supplementary materials and science activity books Additionally a section of references for teachers provides annotated listings of books about science and teaching directories and guides to science trade books and magazines that will help teachers enhance their students science education Resources for Teaching Elementary School Science also lists by region and state about 600 science centers museums and zoos where teachers can take students for interactive science experiences Annotations highlight almost 300 facilities that make significant efforts to help teachers Another section describes more than 100 organizations from which teachers can obtain more resources And a section on publishers and suppliers give names and addresses of sources for materials The guide will be invaluable to teachers principals administrators teacher trainers science curriculum specialists and advocates of hands on science teaching and it will be of interest to parent teacher organizations and parents
