Grade 1 memorandum Geography P2014:

Class in the New Millennium Will Atkinson, 2017-02-17 *Class in the New Millennium* paints a fresh and comprehensive picture of social class in Britain today. Anchored in a broad repertoire of methods and pursuing a distinctive theoretical agenda, it not only painstakingly maps the structure transformation and effects of the UK's key fault lines but goes behind closed doors to see how they play out in everyday family life. Throughout the book, Atkinson throws new light on a diverse array of themes including the continued effects of deindustrialisation, educational expansion, feminisation of the workforce and surging employment insecurity, the persistence of lifestyle cleavages despite cultural and technological change, the growth of political disengagement, the transformation of the Labour Party and the rise of nationalism, the entwinement of class with space, place and physical movement, and the way in which class interacts with intimate relations to shape not just the way we decorate our walls or talk over the dining table but the very reproduction of the class structure itself. This innovative title will appeal to scholars as well as advanced undergraduate and postgraduate students interested in the fields of sociology, politics and political science, cultural studies, cultural geography, social policy and social work. **Asymmetric Crisis in Europe and Possible Futures** Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development. In addition, a discussion of possible scenarios which systematically addresses the implications of anti-crisis policies is missing. This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy. It argues that combining critical political economy approaches and post-Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis. Although both approaches have the capacity to deal with asymmetries and uneven development, the heterogeneity in Europe has been an often largely neglected dimension of analysis. However, this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration. Hence, this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives. This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE, European political economy and European politics. **Taken For A Ride** Matteo Rizzo, 2017-05-19 How does public transport work in an African city under neoliberalism? Who owns what in it? Who has the power to influence its shape and changes in it over time? What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam? These are the main questions that inform this in-depth case study of Dar es Salaam's public transport system over more than forty years. The growth of cities and informal economies are

two central manifestations of globalization in the developing world Taken for a Ride addresses both drawing on long term fieldwork in Dar es Salaam Tanzania and charting its public transport system s journey from public to private provision This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights A longitudinal study of workers throws light on patterns of occupational mobility in the sector and the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it are analysed Taken for a Ride reveals the political economy of public transport exposing the limitations of market fundamentalist and post colonial scholarship on economic informality the urban experience in developing countries and the failure to locate the agency of the urban poor within their economic and political structures It is both a contribution and a call for the contextualised study of actually existing neoliberalism

The Geography of Injustice Barak Kushner, 2024-03-15 In The Geography of Injustice Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan s empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan s imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history
