Sexuality, Society & Pedagogy Dennis A. Francis, 2013-01-01 Sexuality Society and Pedagogy problematises some of the prevailing assumptions that frame this area of study In doing so it aims to make visible the challenges of teaching sexuality education in South African schools while demonstrating its potential for reshaping our conceptions of the social and cultural representations thereof Although the book is largely situated in experiences and perspectives within the South African context it is hoped that the questions raised reflections analyses and arguments will contribute to thinking about sexuality education in diverse contexts in particular more developing contexts Human Rights, Diversity, and National Identity Patricia E. Bromley, 2011 Fundamental world changes that simultaneously undermine a nation state s charisma and promote the rise of a supra national system have wide ranging effects upon national states within a modern global society My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling which are central institutions in every country Globally primary and secondary education initially emerged as the premier tool for nation states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education The analyses consist of two sections Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970 2008 These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well established liberal democracies Cross national quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia BC which examines nation building within a context of strong emphasis on diversity and human rights The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871 It also draws on a selection of historical documents including Ministry of Education reports curricular frameworks and high school exit exams Process wise I find the incorporation of human rights and diversity reflects macro level changes in national and global society Content wise I find four main approaches to reconciling ideas of human rights and diversity with national identity 1 framing human rights and multiculturalism as part of national identity 2 using pedagogical approaches that promote multiple perspectives and individual agency 3 celebrating social and scientific figures and accomplishments as the source of national pride and 4 drawing on exogenous sources to affirm state legitimacy This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world Further students are increasingly taught that the global civil society and non state actors are important and legitimate agents of social change *In Search of Human Dignity* Karin Sporre, 2015 Our human dignity can be taken from us in unjust

relationships which makes resistance and a search for dignity necessary This search can take place in different ways in this book through academic studies in theology ethics and education Human dignity relates to human rights which are also explored here moreover perspectives from gender and postcolonial theory inform the studies The reflection on human dignity ends in a discussion of education making the book a resource in addressing contemporary value issues in education This collection of lectures articles and papers covers a certain time period In the texts particular themes recur which contributes to continuity and coherence The focus of more recently written chapters takes the discussion in new directions Karin Sporre with a PhD in Ethics from Lund University Sweden is Professor in Education focusing on values gender and diversity at Ume University Sweden Since 2001 she has been actively engaged in co operation with South African colleagues This has inspired comparison between South Africa and Sweden exemplified in some of the chapters in her book *In Search of Human Dignity*

Nals Gr1:english Teachers Gde , **Democracy in Textbooks and Student Minds** Holger Daun,2002 This book deals with student perceptions of and attitudes towards democracy and the way democracy is accounted for in the textbooks of four transition countries Although the subject nations are very different otherwise they share the trait of transition in the economic political and social arenas As many countries around the world have become liberal democracies in the last decade there has been no investigation of education s role in this process This book addresses that void by examining the state s role in spreading democratic themes and studying the presentation of democracy and human rights in various textbooks
