Pfenninger, David Singleton, 2017-04-21 This book constitutes a holistic study of how and why late starters surpass early starters in comparable instructional settings Combining advanced quantitative methods with individual level qualitative data it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school thereby offering a long term view of the teenage experience of foreign language learning The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly Taking account of contextual factors individual socio affective factors and instructional factors within a single longitudinal study the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition but that in this context for a number of reasons a later onset can be beneficial

Sandra Lane, 2015-12-03 Syracuse New York In the late 1980s led U.S. cities in African American infant deaths Even today in this all American city infants of color die more than two times as often as white babies Infant mortality is too often addressed as if it were an isolated problem rather than part of a systemic and repeating pattern of embedded racism and structural violence The clearing of whole neighborhoods during urban renewal coupled with the collapse of industry brought unintended consequences Dilapidated rental housing abandoned houses and empty lots provide the conditions for lead poisoning gonorrhea and illicit drug use Inadequate education unemployment and racially biased arrest and sentencing underpin the epidemic of African American male incarceration Inmate fathers cannot provide financial support and only limited emotional support during collect calls from jail or prison Supermarkets fled the inner city where corner stores sell cigarettes malt liquor lottery tickets and drug paraphernalia in place of healthy food The stories and the data in this book show that low birth weight premature birth and infant death are a part of life patterns resulting from systemic discrimination increasing risk over a lifetime and in some cases reaching the next generation
