Explore Results for the 2018 NAEP Geography Assessment

In 2018, the National Assessment of Educational Progress (NAEP) administered the geography assessment to a nationally representative sample of eighth-grade students. The geography assessment was delivered on digital devices for the first time in 2018, as well as on conventional paper and pencil formats. It assessed students' knowledge and skills in three content areas (Space and Place, Environment and Society, and Spatial Dynamics and Connections) and three cognitive areas (knowing, understanding, and applying). Students also answered survey questions about their opportunities to learn and their engagement with geography in and outside of school.

How did students perform in geography?

In 2018, the average geography score for eighth-grade students was 3 points lower compared to 2014. The 2018 average score was not significantly different compared to 1994, the first assessment year.

Bartolini Bussi,Xu Hua Sun,2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts Insights on Education Reform in China Zhiying Nian,2022-09-01 Since the late 1970s China has initiated landmark reforms in education resulting in great strides in international rankings Unlike many recent books on Chinese educational reform which examine macroscopic policies this book examines the universalization of pre school education school selection in elementary education attractiveness of vocational education the operational mode of university charters the development of open universities the credit bank system in building the learning society and other aspects of education and only analyzes one specific problem in each of these contexts for the purpose of

comparing China's educational reforms to their overseas counterparts through microscopic study. *Insights on Education Reform in China* is not intended to provide a complete picture of China's educational reform. Rather, it addresses the types of complicated circumstances under which China has made achievements in educational reform and the conflicts arising in the context of that reform. Topics covered include Education Reform, Equality, Standardization, Governance, Learning, Society.

Learning-Oriented Language Assessment Atta Gebril, 2021-05-11 This collection brings together research on learning-oriented language assessment from scholars working across geographic and educational contexts, highlighting the opportunities of assessment practices which seek to better align assessment and learning tasks and support effective learning. The volume begins by introducing learning-oriented assessment (LOA) and the context around its growing popularity, especially in accountability-oriented settings which favor summative large-scale tests. The first part of the book charts the development of LOA's theoretical and conceptual underpinnings, outlining the ways in which they have been informed by theories of learning and key elements. The second part demonstrates LOA in practice, drawing on examples from different countries and instructional settings to explore such topics as the role of technology in LOA and developing feedback materials based around LOA principles and developed for core literacy skills. Offering a holistic view of learning-oriented assessment and the real-world affordances and challenges of its implementation, this book is key reading for graduate students, researchers, and practitioners in language testing and assessment, TESOL, and language education.

Vocabularians Brenda L. Overturf, 2023-10-10 Building on the ideas developed in *Word Nerds: Teaching All Students to Learn and Love Vocabulary*, Brenda J. Overturf has updated and energized the recommended practices for middle-grade students. *Vocabularians* is for any educator who wants to help young adolescents increase knowledge and competency with word study while bringing interest, motivation, and even joy to their learning. Brenda takes teachers and administrators inside three middle-level schools where educators are integrating vocabulary instruction across the curriculum. In rural, urban, and suburban settings, she highlights effective ways to develop students' vocabulary skills using art, music, games, technology, reading, writing, speaking, listening, and critical thinking. *Vocabularians* shows teachers of all content areas how to build word networks, flood the classroom environment with academic vocabulary, and incorporate the three word-solving strategies that researchers have found to be the most important: teaching students how to use context, deciphering words by breaking down prefixes, suffixes, and root words, and using reference materials in authentic ways. By blending current research with real classroom experience and application, Brenda builds on her work with Margot Holmes Smith and Leslie Montgomery and offers an easy-to-implement, customized middle-school resource that will improve instruction and assessment. As one featured seventh grader shared: Vocabulary helps you because the more you know words, the more fluent you can be in reading; the better you can read and write, and the better your writing sounds. There's always going to be a time when you have to sound professional, whether you're applying for a job or anything else. You're just going to have to know how to use a

good vocabulary *Homework, Learning and Academic Success: The Role of Family and Contextual Variables* Antonio Valle, Susana Rodríguez, Pedro Rosário, Mar Lorenzo Moledo, 2020-02-24 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework This will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool Although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework However the time spent on homework is not in itself evidence of the student s involvement nor is time spent indicative of quality time Indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence It is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation In tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments The decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student s motivation and the student s level of engagement with homework Furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework Lastly the effectiveness of teacher feedback depends on its contribution to the student s educational progress and how that student will perform in the future In addition to the student who performs the task and the teacher who prescribes and corrects it we must not lose sight of parents role Although there are discrepancies regarding the role that parents play in relation to homework it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out Everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties In this way providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process its prescription and correction Overall we aim to cease making homework a source of conflict and controversy at the socio educational level in order to provide useful instruments for improving the quality of student learning This work was developed with the financing of the research projects EDU2013 44062 P MINECO EDU2017 82984 P MEIC Public Choice Franklin G.
