

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of error / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

Student	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name two planets in the solar system.

[2 marks]

Student	Response	Marks awarded
1	Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune	0

3.2 Marking of short-answer questions / short-answer

For questions requiring a short-answer response, the whole response of a respondent (short-answer response) will be marked as correct or incorrect. If the respondent has provided a correct answer to the question, the whole response will be marked as correct.

3.3 Marking of short-answer questions / short-answer

When a respondent provides a short-answer response to a question, the whole response will be marked as correct or incorrect. If the respondent has provided a correct answer to the question, the whole response will be marked as correct.

3.4 Marking of short-answer

When a respondent provides a short-answer response to a question, the whole response will be marked as correct or incorrect. If the respondent has provided a correct answer to the question, the whole response will be marked as correct.
