

3. Conceptual Framework

The conceptual framework of this research builds on the theory that training and development programs positively impact employee engagement and satisfaction. The following elements are considered:

- **Employee Engagement:** The emotional and intellectual commitment of employees to their jobs.
- **Job Satisfaction:** The extent to which employees feel content and fulfilled in their roles.
- **Training & Development (T&D):** Structured programs designed to enhance the knowledge, skills, and abilities of employees.

The model proposes that effective T&D initiatives drive employee engagement by providing a platform for professional growth and by aligning personal career goals with the organizational mission. This engagement, in turn, leads to higher job satisfaction, thereby improving employee retention and organizational performance.

4. Methodology

This research uses a mixed-methods approach to assess the impact of T&D programs on employee engagement and job satisfaction. The quantitative data was collected through employee surveys in organizations across different sectors. The survey measured levels of employee engagement, satisfaction, and the availability of T&D opportunities. Qualitative data were gathered through interviews with HR managers and employees who have participated in T&D programs, providing a deeper understanding of individual experiences.

4.1 Sample Selection

A total of 250 employees from various industries, including technology, healthcare, and finance, were selected. The respondents ranged in age, experience, and job positions to ensure diverse perspectives.

4.2 Data Collection

The survey consisted of Likert-scale questions focused on employee perceptions of training opportunities, engagement at work, and satisfaction with their current roles. Interview questions explored how employees felt after participating in training programs, with a focus on career advancement and personal growth.

In the new edition, the authors have further explored the international context for HRM, not just for multinational corporations but also for small businesses and not-for-profit organizations, with added analysis on the importance of recognizing that effective functioning of organizations is not simply measured by financial performance but also by taking into account the broader social, economic, and political contexts.
