Evolutionary Programming IV John R. McDonnell, Robert G. Reynolds, David B. Fogel, 1995 Title List of Documents
Made Publicly Available U.S. Nuclear Regulatory Commission, 1981 Florida Bay Research Programs and Their Relation to
the Comprehensive Everglades Restoration Plan National Research Council, Division on Earth and Life Studies, Board on
Environmental Studies and Toxicology, Water Science and Technology Board, Committee on Restoration of the Greater
Everglades Ecosystem, 2002-10-10 This report is a product of the Committee on Restoration of the Greater Everglades
Ecosystem CROGEE which provides consensus advice to the South Florida Ecosystem Restoration Task Force The Task Force
was established in 1993 and was codified in the 1996 Water Resources Development Act WRDA its responsibilities include
the development of a comprehensive plan for restoring preserving and protecting the South Florida ecosystem and the
coordination of related research The CROGEE works under the auspices of the Water Science and Technology Board and the
Board on Environmental Studies and Toxicology of the National Research Council The CROGEE s mandate includes providing
the Task Force not only with scientific overview and technical assessment of the restoration activities and plans but also
providing focused advice on technical topics of importance to the restoration efforts One such topic was to examine the
linkage between the upstream components of the greater Everglades and adjacent coastal ecosystems This report addresses
this issue by breaking it down into three major questions What is the present state of knowledge of Florida Bay the Bay on
scientific issues that relate to the success of the overall CERP What are the potential long term effects of Everglades
restoration as currently designed on the nature and condition of the Bay What are the critical science questions that should
be answered early in the restoration process to design a system that benefits not only the terrestrial and freshwater aquatic
Everglades but the Bay as well This study was inspired in part by the 2001 Florida Bay and Adjacent Marine Systems Science
Conference held on April 23 26 2001 in Key Largo Florida An overlapping meeting of the CROGEE was held at the same
location on April 26 28 2001 The conference was organized by the Program Management Committee PMC of the Florida Bay
and Adjacent Marine Systems Science Program The PMC organized the conference around five questions suggested by the
Florida Bay Science Oversight Panel These questions related to circulation salinity patterns and outflows of the Bay nutrients
and the nutrient budget onset persistence and fate of planktonic algal blooms temporal and spatial changes in seagrasses
and the hardbottom community and recruitment growth and survivorship of higher trophic level species Some of these issues
are discussed in the present report However as noted earlier this report focuses on the subset of questions that relate to
linkages between the Bay and the upstream portion of the Everglades system that arose at the 2001 Florida Bay Conference
