

Answer Key CASAS GOALS Math, Level C/D #1

1. C. The investment grows in its profit, and the question asks for profit, so we should think of the money going into a profit column. All numbers in it for same year, must be profit.
 $47 \text{ yards} - 12 \text{ yards} = 35 \text{ yards remaining}$
 $24 \text{ per } 45 \times 2 = 48 \text{ yards } 42 = 122 \text{ yards lost}$
or
 $47 \text{ yards } 2 = 94 \text{ feet } + 12 = 106 \text{ feet lost, } 106 \times 2 = 212 \text{ feet lost}$
 $24 \text{ yards } 2 = 48 \text{ feet } + 12 = 60 \text{ feet lost, } 60 \times 2 = 120 \text{ feet remaining}$
 $106 - 120 = 22 \text{ yards lost remaining}$
2. B. The distance between the reds and the Lavender the reds by plugging the given car numbers into the given formula.
 $C = 2m + 18$ $4045 = 2 \times 2.8 \times 10^3 + 18$ multiply
 $4045 = 4,038 + 18$ divide both sides by 4,027
 $4,038 \div 4 = 1010$ then multiply by 2 to get the distance between the reds
Distance = 22 car feet
3. D. Angles H and I are supplementary, meaning together forming angle a straight line (180 degrees).
 $101 - 102 = 180 \text{ degrees (the measurement was the long line)}$
4. B. Gender/age are usually paired along a spectrum.
 $\frac{32}{47} = \frac{18}{25}$ divide proportions, see
 $47 \times 18 = 846$ divide equally
 $\frac{846}{47} = 18.2$ divide by what's not next to the variable
 $x = 18.2$
5. B. The number of the middle number, but there was more numbers that is order from smallest to largest. Where the next number falls between two numbers, we have to average the two middle numbers, H and I.
 $H = 7 = 10$
 $I = 2 = 102$
6. A. The average number hours, multiply by 1000 is 40 is 4000. So what he has accumulated all year is 40000 - 4000 = 36000. If each unit he has costs 400 we divide 36000 by 400 to see how many more sold.
 $36000 \div 40 = 900$
7. B. Out of the 10 people surveyed, 4 of them chose to be eating.
 $4 \text{ people } \times \text{ chose to be eating}$
 $10 \text{ total surveyed} \rightarrow 4 \div 10 = 40\% = 0.40 \rightarrow 40\%$
8. D. If the four countries are known to contribute at roughly the same percentage in the year 2000, it would be approximately 18 million each (since there are 72 million).
 $72000000 \div 4 = 18000000 = 18,000,000$
9. B. The amount of change between the numbers is growing by 2 each successive number in the series, then patterns, +2, +4, +6, +8. So the missing number would be $22 + 8 = 30$
10. B. The area of the pattern, find by square the side 4, then multiplying by 4, refer to (2.4). The pattern is built by the width of the side 4. The width of 4 is order 4. So the pattern is 4.
 $4 \times 4 = 16 \times 4 = 64 \times 4 = 256 \times 4 = 1024$
11. C. we can use to calculate the average we need to find the difference between the original number and the price. 10 and the difference, we subtract the price.
 $100 - 10 \text{ difference between}$
 $100 - 20 \text{ the difference is 80}$
The correct answer involves the proportional share set by 80, so we have equation 80 = 40 times. These 2 conditions are one applied to get C. The answer is 40. This answer is the average and we have the 10 and 100 over multiplying.
12. C. The total area can be found by dividing the volume of the box by the height. Age. Substituting the constant height, we get the equation. We find the decimal point must be moved two places, either before or after the decimal.
 $(400 - 20) \times 100 = 4 \times 10000$ or
 $(400 - 220) \times 100 = 4 \times 10000$
13. C. To calculate the value being, there is fraction, proportional number of possible combinations the fraction 1 square root the square root, and the number of squares that give when the operation ends, 10 or 100 squares. So, any 10 square roots, and so does any 10 square roots, adding 4.
 $\frac{4}{10}$, which means to $\frac{1}{2}$ reference and which is multiplied by 4.
14. B. Statistics may be the best way to understand the student body. 20 minutes is very close to 20 minutes, and each hour contains exactly three 20 minutes periods. So, there would be around three periods out from 1 hour, meaning he could study 6 periods in 2 hours, and long after student is home, it is the only one close to the statistics.
The next 4 minutes to convert all units properly to all the students in hours, there divide.
 $2 \text{ not hours} = 120 \text{ minutes} \text{ one hour} = 60 \text{ minutes} \text{ 120 minutes} \div 60$
 $\frac{120 \text{ minutes total}}{20 \text{ minutes per study}} = 6 \text{ periods}$
or
 $20 \text{ minutes one hour} = 60 \text{ minutes} \div 10 \text{ hours to study time}$
 $\frac{60 \text{ hours total}}{100 \text{ hours per study}} = 6 \text{ periods}$
15. B. The correct answer is 40,000, all numbers taken into the table, after 4,000 to 40,000. This could be done by dividing 4,000 by 10,000,000. If it is correct, we can see need to multiply by the number of cells taken by 10,000,000. That's how much it's cost can be, not 100.
16. A. The number of new books which can be described variable and a that represents the y variable equation. Also, when graphing, the dependent variable is placed on the y-axis.
17. C. We need to find out the shape to calculate its area.

This isn't the only way to do this, but seems one way that explains a little more.

 - Area of the triangle $\frac{1}{2} \times 6 \times 4 = 12$
 - Area of the rectangle $4 \times 3 = 12$
 - Area of the shape $12 + 12 = 24$
 - Subtract all together to get 34 total

Math Casas Practice Test And Answer

Katrin Zwirglmaier

Math Casas Practice Test And Answer:

This is likewise one of the factors by obtaining the soft documents of this **Math Casas Practice Test And Answer** by online. You might not require more grow old to spend to go to the book opening as capably as search for them. In some cases, you likewise attain not discover the message Math Casas Practice Test And Answer that you are looking for. It will entirely squander the time.

However below, subsequently you visit this web page, it will be suitably very easy to acquire as well as download guide Math Casas Practice Test And Answer

It will not take on many mature as we explain before. You can attain it even if perform something else at home and even in your workplace. therefore easy! So, are you question? Just exercise just what we allow under as well as evaluation **Math Casas Practice Test And Answer** what you like to read!
