(Chapter – 3) (Pair of Linear Equations in two variables) (Exercise 3.1)  
(Class X)

## Question 1:

Form the pair of linear equations in the following problems, and find their solutions graphically.

(i) 10 students of Class X took part in a Mathematics quiz. If the number of girls is 4 more than the number of boys, find the number of boys and girls who took part in the quiz.

(ii) 5 pencils and 7 pens together cost ₹ 50, whereas 7 pencils and 5 pens together cost ₹ 46. Find the cost of one pencil and that of one pen.

## Answer 1:

(i) Let the number of girls =  $x$  and let the number of boys =  $y$

Total number of students = 10

Therefore,  $x + y = 10$  ... (1)

According to question, number of girls is 4 more than the number of boys, so,  $x = y + 4$  ... (2)

To represent graphically, three solutions of each equation is needed.

From the equation (1), we get

$$x = 10 - y$$

$x$	5	4	6
$y$	5	6	4

From the equation (2), we get

$$x = y + 4$$

$x$	5	4	3
$y$	1	0	-1

(ii) Let the cost of one pencil = ₹  $x$  and let the cost of one pen = ₹  $y$

According to first condition,

$$5x + 7y = 50 \quad \dots (1)$$

According to second condition,

$$7x + 5y = 46 \quad \dots (2)$$

To represent graphically three solutions of each equation is given below,

From the equation (1), we get

$$x = \frac{50 - 7y}{5}$$

$x$	3	10	-4
$y$	5	0	10

From the equation (2), we get

$$x = \frac{46 - 5y}{7}$$

$x$	8	3	-2
$y$	-2	5	12

## Question 2:

On comparing the ratios  $\frac{a_1}{a_2}$ ,  $\frac{b_1}{b_2}$  and  $\frac{c_1}{c_2}$ , find out whether the lines representing the following pairs of linear equations intersect at a point, are parallel or coincident:

(i)  $5x - 4y + 8 = 0$

$7x + 6y - 9 = 0$

(ii)  $9x + 3y + 12 = 0$

$18x + 6y + 24 = 0$

(iii)  $6x - 3y + 10 = 0$

$2x - y + 9 = 0$

**Variational Inequalities and Frictional Contact Problems** Anca Capatina, 2014-09-16 Variational Inequalities and Frictional Contact Problems contains a carefully selected collection of results on elliptic and evolutionary quasi variational inequalities including existence uniqueness regularity dual formulations numerical approximations and error estimates ones By using a wide range of methods and arguments the results are presented in a constructive way with clarity and well justified proofs This approach makes the subjects accessible to mathematicians and applied mathematicians Moreover this part of the book can be used as an excellent background for the investigation of more general classes of variational inequalities The abstract variational inequalities considered in this book cover the variational formulations of many static and quasi static contact problems Based on these abstract results in the last part of the book certain static and quasi static frictional contact problems in elasticity are studied in an almost exhaustive way The readers will find a systematic and unified exposition on classical variational and dual formulations existence uniqueness and regularity results finite element approximations and related optimal control problems This part of the book is an update of the Signorini problem with nonlocal Coulomb friction a problem little studied and with few results in the literature Also in the quasi static case a control problem governed by a bilateral contact problem is studied Despite the theoretical nature of the presented results the book provides a background for the numerical analysis of contact problems The materials presented are accessible to both graduate under graduate students and to researchers in applied mathematics mechanics and engineering The obtained results have numerous applications in mechanics engineering and geophysics The book contains a good amount of original results which in this unified form cannot be found anywhere else
