MES **Math Wars** Carmen Latterell,2004-12-30 This book is written for parents and other interested parties so that they can understand the great debate taking place in many states in this country about how to teach basic math The debate centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are concerned about their children s math learning Teachers are concerned about math teaching When parents see what children are bringing home under the new curriculum it is clear that their children are not working on the same mathematics that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary mathematics courses are the fear of many students The standards created by the NCTM do not necessarily prepare students for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for parents to do anything about the confusing state of mathematics education This book provides some answers **Leading Change Through Evaluation** Kristen L. Rohanna,2021-09-08 This book shows why those hoping to use evaluation to drive change in complex systems rather than develop or improve one program policy or product need to shift from the oversimplified idea of formative evaluation to a more specified continuous improvement model grounded in improvement science In doing so author Kristen L Rohanna provides guidance to both evaluators and others such as K 12 educators or hospital administrators who lead improvement initiatives in their organizations and seek to solve persistent problems of practice **Reader's Guide to Periodical Literature Supplement** ,1923 *The Journal of Educational Method* James Fleming Hosc,1922 *Mathematics Teachers at Work* Janine T. Remillard,Beth A. Herbel-Eisenmann,Gwendolyn M. Lloyd,2011-09-20 This book compiles and synthesizes existing research on teachers use of mathematics curriculum materials and the impact of curriculum materials on teaching and teachers with a particular emphasis on but not restricted to those materials developed in the 1990s in response to the NCTM s Principles and Standards for School Mathematics Despite the substantial amount of curriculum development activity over the last 15 years and growing scholarly interest in their use the book represents the first compilation of research on teachers and mathematics curriculum materials and the first volume with this focus in any content area in several decades *Cross-Cultural Online Learning in Higher Education and Corporate Training* Keengwe, Jared,2014-01-31 This book brings together researchers who study and professionals who design and deliver online training across cultures in both higher education and corporate training settings to share paradigms perspectives insights best practices challenges and best practices Provided by publisher **Evaluation of the California Mathematics Project** California Postsecondary Education Commission,1986 *Hands-On Math Projects With Real-Life Applications* Judith A.
