Zoo-A-Logical Math Thomas Kearney, 2012-04

The work for this book began with a course I created and taught called Animal Behavior I always knew that there was a strong magnetic bond between people and animals but it wasn t until I began working on my curriculum that I truly found out how strong this bond really was Millions of people young and old will visit zoos and aquariums each year People stand in front of the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into

the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with

education they are often unsure of their role in their children's learning and the best ways to help their children to succeed academically. Moreover, with the changes in how math and literacy are being taught, parents often struggle with helping even first grade children with their homework. In this book, we set out to alleviate this struggle by offering parents a resource they can use to navigate their child's education, communicate with teachers, and support their children in learning mathematics and literacy. After providing an overview of the current educational climate and tips for communication with teachers, we share strategies and suggestions parents can use to assist their children in language arts and mathematics. We provide detailed descriptions of activities, games, books, and conversations that connect with what children will be learning at each grade level.

The Guantánamo Lawyers Mark P. Denbeaux, Jonathan Hafetz, 2009-11-09. Following the terrorist attacks of September 11, 2001, the United States imprisoned more than 750 men at its naval base at Guantánamo Bay, Cuba. The detainees, ranging from teenagers to elderly men from over forty different countries, were held for years without charges, trial, or a fair hearing. Without any legal status or protection, they were truly outside the law, imprisoned in secret, denied communication with their families, and subjected to extreme isolation, physical and mental abuse, and in some instances, torture. These are the detainees' stories told by their lawyers, because the prisoners themselves were silenced. It took lawyers who had filed habeas corpus petitions over two years to finally gain the right to visit and talk to their clients at Guantánamo. Even then, lawyers worked under severe restrictions designed to inhibit communication and maximize secrecy. Eventually, however, lawyers did meet with their clients. This book contains over 100 personal narratives from attorneys who have represented detainees held at Guantánamo as well as at other overseas prisons, from Bagram Air Base in Afghanistan to secret CIA jails or black sites.

Cold War Children's Television Vibiana Bowman Cvetkovic, 2023-10-16 Cold War Children s Television Philadelphia as a Case Study examines a culturally significant phenomenon of the Cold War the locally produced hosted children s show The Cold War era and the coming of age of commercial television were entwined not only chronologically but

societally The era of the locally produced hosted show closed in the wake of Sesame Street due to shifts in social policy industry economics and rising expectations for children programming Through the lens of cultural and historical analysis this book reveals that beyond that nostalgia lies a vital visual form that thrived in the Cold War era one that reflected the ideals of childhood media and nation of a societal terrain from which the American children s television host emerged

Community-based Control of Invasive Species Theodore Alter,Paul Martin,Don Hine,Tanya Howard,2019-06-01

Invasive species are among the greatest challenges to environmental sustainability and agricultural productivity in the world One of the most promising approaches to managing invasive species is voluntary citizen stewardship However in order for control measures to be effective private citizens often need to make sustained and sometimes burdensome commitments Community Based Control of Invasive Species is based on five years of research by leading scholars in natural resource and human behavioural sciences which involved government and citizen groups in Australia and the United States It examines questions including how can citizens be engaged in voluntarily managing invasive species what communication strategies will ensure good motivation and coordination and how can governing bodies support citizens in their efforts With chapters on institutional frameworks changing governance systems thinking organisational learning engagement communication and behavioural change this book will be a valuable reference for researchers and practitioners involved in natural resources management

Lets delve into the realm of bestselling books, exploring the engaging narratives that have charmed audiences this year. Math Kangaroo In Usa 2009 : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
