

2) Look at the number cube. If Elia rolls the die 24 times, what is the probability that he will land on a number 4 or lower? Explain your thinking. (3 marks)

Explain your thinking. (3 marks)

Land on:

1, 2, 3, 4

Not landed on:

5, 6

Probability is $4/6 = 0.67$

If he rolls it 24 times $= 24 \times 0.67 = 16$ times

The probability that he will land on a number 4 or lower is 16 times

Part C: Critical Thinking and EQAO Connections (____/12 marks)

Math Makes Sense 4 Probability Answer:

The Math Handbook Richard Elwes, 2013-11-05 This is the perfect introduction for those who have a lingering fear of math. If you think that math is difficult, confusing, dull, or just plain scary, then *The Math Handbook* is your ideal companion. Covering all the basics including fractions, equations, primes, squares, and square roots, geometry, and fractals, Dr. Richard Elwes will lead you gently towards a greater understanding of this fascinating subject. Even apparently daunting concepts are explained simply with the assistance of useful diagrams and with a refreshing lack of jargon. So whether you're an adult or a student, whether you like Sudoku but hate doing sums, or whether you've always been daunted by numbers at work, school, or in everyday life, you won't find a better way of overcoming your nervousness about numbers and learning to enjoy making the most of mathematics.

Math Makes Sense!: A Constructivist Approach To The Teaching And Learning Of Mathematics Ana Helvia Quintero, Hector Rosario, 2016-03-02 The methods for teaching mathematics usually follow the structure of mathematics. The problem with this is that the structure of mathematics took centuries of elaboration to develop and is not the same as how one originally experiences mathematics. Based on research of how mathematics is actually learned, this book presents an innovative approach for teaching mathematics that will engage pupils and can have lifelong benefits for how they take on board more advanced mathematical topics. *Math Makes Sense* makes use of the realistic mathematics education (RME) philosophy which bridges the gap between informal mathematics learning such as in day-to-day life and more formal teaching in school. Many real-life situations as examples for learning are included, as well as different mathematical and logic puzzles that will stimulate learning and foster understanding. The ideas presented are not confined to one national curriculum and so can be helpful worldwide to teachers, instructors, both in practice and those still in training, private tutors, homeschooling parents, and educational researchers.

Strategies for Building Academic Vocabulary in Mathematics Christine Dugan, 2010-02-01 Boost students' mathematics vocabulary with easy-to-implement effective strategies. Sample lessons using each strategy are included for grade spans K-2, 3-5, 6-8, and 9-12, using vocabulary words from standards-based content-specific units of study.
