many articles not easily found anywhere else and you don't need to be a mathematician to enjoy them. These writings offer surprising insights into the nature, meaning, and practice of mathematics today. They delve into the history, philosophy, teaching, and everyday occurrences of math and take readers behind the scenes of today's hottest mathematical debates. Here David Hand explains why we should actually expect unlikely coincidences to happen. Arthur Benjamin and Ethan Brown unveil techniques for improvising custom-made magic number squares. Dana Mackenzie describes how mathematicians are making essential contributions to the development of synthetic biology. Steven Strogatz tells us why it's worth writing about math for people who are alienated from it. Lisa Rougetet traces the earliest written descriptions of Nim, a popular game of mathematical strategy. Scott Aaronson looks at the unexpected implications of testing numbers for randomness and much, much more. In addition to presenting the year's most memorable writings on mathematics, this must-have anthology includes a bibliography of other notable writings and an introduction by the editor, Mircea Pitici. This book belongs on the shelf of anyone interested in where math has taken us and where it is headed.

Experimental and Computational Mathematics
Jonathan M. Borwein, 2010. A quiet revolution in mathematical computing and scientific visualization took place in the latter half of the 20th century. These developments have dramatically enhanced modes of mathematical insight and opportunities for exploratory computational experimentation. This volume collects the experimental and computational contributions of Jonathan and Peter Borwein over the past quarter century.
