Computers and the Classroom ,1982 **Publications of the Faculty** Florida State University,1960 *Parameters* ,1996 **An Age of Accountability** John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *Research in Education* ,1973 *Creating Life-Long Learners* Todd Stanley,2015-07-30 Wanted for the global workforce thinkers and those who can teach them Where K 12 instruction once centered on content and memorization today s educators want most of all to teach their students to think critically and perceptively What better way than with project based learning PBL Author Todd Stanley provides a teacher friendly step by step approach to implementing PBL showing readers how to Use project and classroom management skills to create a positive productive learning environment Develop curriculum around ten different project types Link projects with today s standards Teach students how to effectively collaborate and bring out the best in each other Microcomputers and Education Jack Culbertson,Luvern L.
