

EXCEL TEMPLATES OPERATIONS GUIDE

EXCEL TEMPLATES were developed by McGraw-Hill/Irwin to accompany **MANAGERIAL ACCOUNTING, 14th Edition, by Garrison, Noreen, and Brewer**. It is designed to provide you, the student, with experience in using microcomputers in accounting by working selected problems at the end of chapters, using spreadsheet templates developed for Excel 2000. The purpose of this guide is to provide general software operating instructions as well as to provide specific help in completing Excel Template problems. The guide is divided into five sections:

Using Excel 2003: This section is an abbreviated guide to using Excel spreadsheet software. It is not meant to be a comprehensive user's manual; rather, it is an introduction to the terminology, features and keystrokes necessary to work with Excel Templates.

Installation and Configuration: This section will lead you through the steps necessary to copy Excel Template problems on your computer's hard drive.

Using Excel Templates: This section will provide information on the general operating conventions of the software. It will detail the use of specific keys on the computer keyboard and point out features that are common to all screens and data input routines.

Step-by-Step Example: In this section, you will have the opportunity to work through a representative problem to develop a feel for using the software. Although the problem may cover areas of accounting not yet learned, it is suggested that this exercise be completed to familiarize you with the software rather than trying to understand the specific accounting concepts.

Guide to Individual Problems: This section will outline individual differences or special procedures of which you should be aware.
