 Plant and Process Engineering 360 will be the backbone of any plant chemical or process engineer s library This is a broad  
 area in which engineers need to be familiar with a wide array of techniques technologies and equipment Its focus on  
 providing a broad introduction to key systems make the book the first point of reference for engineers who are involved with  
 designing specifying maintaining or working with plant process and control technologies in many sectors including  
 manufacturing chemical process and energy A single source of plant and process equipment information for engineers  
 providing a 360 degree view of the critical equipment engineers encounter Enables readers to get up to speed with  
 unfamiliar topics quickly with an overview of important but disparate technologies that are specific to plant engineering  
 Covers the systems and processes that drive effective and efficient plants and processes Drawn from authoritative Elsevier

Gen Reader Free Key Features Learn the ins and outs of industrial automation and control by taking a pragmatic approach Gain practical insights into automating a manufacturing process using PLCs Discover how to monitor and control an industrial process using HMIs and SCADA Book Description Industrial automation has become a popular solution for various industries looking to reduce manual labor inputs and costs by automating processes This book helps you discover the abilities necessary for excelling in this field The book starts with the basics of industrial automation before progressing to the application of switches sensors actuators and motors and a direct on line DOL starter and its components such as circuit breakers contactors and overload relay Next you ll explore VFDs their parameter settings and how they can be wired and programmed for induction motor control As you advance you ll learn the wiring and programming of major industrial automation tools PLCs HMIs and SCADA You ll also get to grips with process control and measurements temperature pressure level and flow along with analog signal processing with hands on experience in connecting a 4 20 mA transmitter to a PLC The concluding chapters will help you grasp various industrial network protocols such as FOUNDATION Fieldbus Modbus PROFIBUS PROFINET and HART as well as emerging trends in manufacturing Industry 4 0 and its empowering technologies such as IoT AI and robotics By the end of this book you ll have gained a practical understanding of industrial automation concepts for machine automation and control What you will learn Get to grips with the essentials of industrial automation and control Find out how to use industry based sensors and actuators Know about the AC DC servo and stepper motors Get a solid understanding of VFDs PLCs HMIs and SCADA and their applications Explore hands on process control systems including analog signal processing with PLCs Get familiarized with industrial network and communication protocols wired and wireless networks and 5G Explore current trends in manufacturing such as smart factory IoT AI and robotics Who this book is for This book is for both graduates and undergraduates of electrical electronics mechanical mechatronics chemical or computer engineering engineers making a career switch or anyone looking to pursue their career in the field of industrial automation The book covers topics ranging from basic to advanced levels and is a valuable reference for beginner level electrical IIoT automation process instrumentation and control production and maintenance engineers working in manufacturing and oil and gas industries among others

*Case Studies in Control* Stanko Strmčnik, Đani Juričić, 2013-06-12

*Case Studies in Control* presents a framework to facilitate the use of advanced control concepts in real systems based on two decades of research and over 150 successful applications for industrial end users from various backgrounds In successive parts the text approaches the problem of putting the theory to work from both ends theoretical and practical The first part begins with a stress on solid control theory and the shaping of that theory to solve particular instances of practical problems It emphasizes the need to establish by experiment whether a model derived solution will perform properly in reality The second part focuses on real industrial applications based on the needs and requirements of end users Here the engineering approach is dominant but with theoretical input of varying degree depending on the particular process involved Following

the illustrations of the progress that can be made from either extreme of the well known theory practice divide the text proceeds to a third part related to the development of tools that enable simpler use of advanced methods a need only partially met by available commercial products Each case study represents a self contained unit that shows an experimental application of a particular method a practical solution to an industrial problem or a toolkit that makes control design and implementation easier or more efficient Among the applications presented are wastewater treatment manufacturing of electrical motors temperature control of blow moulding burn protective garments quality assessment and rapid prototyping Written by contributors with a considerable record of industrially applied research Case Studies in Control will encourage interaction between industrial practitioners and academic researchers and be of benefit to both helping to make theory realistic and practical implementation more thorough and efficacious Advances in Industrial Control aims to report and encourage the transfer of technology in control engineering The rapid development of control technology has an impact on all areas of the control discipline The series offers an opportunity for researchers to present an extended exposition of new work in all aspects of industrial control

**Machinery, Materials Science And Energy Engineering (Icmmsee 2015) - Proceedings Of The 3rd International Conference** Guangde Zhang, 2015-07-03 With the rapid development of machinery materials science and energy engineering technology in China new theories and application results constantly appear Higher and newer requirements in these fields are sought by business enterprises and members of the engineering profession This conference was held to further promote the exchange and cooperation among local researchers to upgrade the academic standards and international influence on the study of these fields in China and to play a positive role in bridging the gap with the international research community This volume consists of 106 peer reviewed articles by local and foreign eminent scholars which cover the frontiers and hot topics in machinery and process equipment materials science energy engineering and mechatronics

**Techno-Societal 2020** Prashant M. Pawar, R. Balasubramaniam, Babruvahan P. Ronge, Santosh B. Salunkhe, Anup S. Vibhute, Bhuwaneshwari Melinamath, 2021-06-19 This book divided in two volumes originates from Techno Societal 2020 the 3rd International Conference on Advanced Technologies for Societal Applications Maharashtra India that brings together faculty members of various engineering colleges to solve Indian regional relevant problems under the guidance of eminent researchers from various reputed organizations The focus of this volume is on technologies that help develop and improve society in particular on issues such as advanced and sustainable technologies for manufacturing processes environment livelihood rural employment agriculture energy transport sanitation water education This conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region On the other hand technologies proposed by expert researchers may find applications in different regions This offers a multidisciplinary platform for researchers from a broad range of disciplines of Science Engineering and Technology for reporting innovations at different levels
