BrilliantColour™ Technology and Mitsubishi Engineering Provide Superior Colour Performance

BrilliantColour™ Technology is the latest innovation to produce richer colours and vibrant images. To further enhance performance, Mitsubishi has developed a new 8-segment colour wheel, adding yellow and cyan segments to the usual red, green, blue and white segments, therefore producing a wider colour spectrum. In addition, colour algorithms have been coded to provide emphasis on brightness or colour modes, according to the environment.

This above technology coupled with selective lamp powered modulation techniques, ensures that the XD510U acts intelligently to boost colours, improving the intensity and vibrancy of the entire displayed image.
