Alcoholic drinks and mixtures made from natural ingredients ,2024-04-04 This book is about brewing in general not just making beer but having fun fermenting all kinds of delicious concoctions with whatever we find on offer from nature be that the wilderness or our backyards or gardens We re talking odd wild and primitive beers sodas herbal meads inebriating or not infusions and many other types of fermented drinks that are sometimes hard to classify It s about exploring boozy possibilities in creative ways the way humans have for a very long time What s not to like about that My big discovery when working on this book was the fact that brewing is really a continuous linear activity We like to chop up this creative line into small discrete segments and impose etiquettes on them That s a beer that s a wine or that s a soda But the truth is that humans since the dawn of time have been brewing boozy concoctions that often transcend regular labels You ll find all kinds

of interesting drinks that are really a blend between beers and wines or sodas and beers And it s all good Brewing should be about creativity flavors and in some cases medicinal applications Like many enjoyable activities it s a lot less fun when you re told what you can or cannot do It s an interesting statement for an author to make but I would like you to look at this book not in terms of precise recipes you can make at home but more as a book of concepts and ideas that will enable you to explore and create with your own local ingredients The fun is really in dreaming up and brewing your own delicious drinks so look at the techniques described here and see what you can come up with If there is an overall message I want to convey it is that brewing is fun adventurous and extremely rewarding Don t be afraid to experiment You might make a few mistakes here and there mostly in the beginning but those will be dwarfed by the countless yummy drinks you ll create and be successful at making Hopefully the basic procedures in this book will help and I can t wait to hear about the delicious beverages you ll make with the plants surrounding you If you already have experience in making beers you may find some of the methods described here a bit primitive and unusual the use of molasses and other sources of sugar including insect honeydew instead of malt wild yeast extraction from local fruits flowers and plants unusual bitter wild plants instead of regular hops and the overall lack of grains I hope this book will nevertheless inspire you to explore your own terroir and possibly integrate some local flavors into your brews The most important message from this book is really Explore have fun and create That s the stuff life should be made of
