Reactions of Hydrocarbons and Related Compounds Herman Pines, 2012-12-02 Base Catalyzed Reactions of Hydrocarbons and Related Compounds focuses on the use of bases as catalysts for the conversion of hydrocarbons and related compounds. In order to emphasize the broad scope of base catalyzed reactions, examples dealing with the conversion of non hydrocarbons are given. Comprised of 14 chapters, this book begins with a historical overview of base catalyzed conversions of hydrocarbons, followed by a discussion on the isomerization of olefins, acetylenes and allenes, as well as the dimerization and oligomerization of hydrocarbons. The reader is then introduced to a variety of reactions, including those between aromatic hydrocarbons and olefins, and between alkylpyridines and alkenylpyridines, homogeneous carbon-carbon addition reactions, and reactions of aprotic solvents with olefins. Subsequent chapters explore carbon-carbon addition of olefins with miscellaneous compounds, addition of ammonia, amines, and anilines to olefinic hydrocarbons, hydrogenation and oxygenation, dehydrogenation, aromatization, and hydrogen transfer, and dehydration of alcohols. This monograph will be of interest to chemists. Chemistry: The Central Science Theodore L. Brown, H. Eugene LeMay Jr., Bruce E. Bursten, Catherine Murphy, Patrick Woodward, Steven Langford, Darius Sagatys, Adrian George, 2013-10-04 If you think you know the Brown LeMay Bursten Chemistry text, think again. In response to market request, we have created the third Australian edition of the US bestseller Chemistry: The Central Science. An extensive revision has taken this text to new heights. Triple checked for scientific accuracy and consistency, this edition is a more seamless and cohesive product, yet retains the clarity, innovative pedagogy, functional problem solving, and visuals of the previous version. All artwork and images are now consistent in quality across the entire text. And with a more traditional and logical organisation of the Organic Chemistry content, this comprehensive text is the source of all the information and practice problems students are likely to need for conceptual understanding, development of problem solving skills, reference, and test preparation. *Sif Chemistry NI Tb* Rex M.
