The impact of Ethiopia's Productive Safety Net Programme on the nutritional status of children: 2008-2012 Berhane, Guush, Hoddinott, John F., Kumar, Neha, 2017-02-03 Ethiopia's Productive Safety Net Programme PSNP is a large scale social protection intervention aimed at improving food security and stabilizing asset levels The PSNP contains a mix of public works employment and unconditional transfers It is a well targeted program however several years passed before payment levels reached the intended amounts The PSNP has been successful in improving household food security However children's nutritional status in the localities where the PSNP operates is poor with 48 percent of children stunted in 2012 This leads to the question of whether the PSNP could improve child nutrition In this paper we examine the impact of the PSNP on children's nutritional status over the period 2008-2012 Doing so requires paying particular attention to the targeting of the PSNP and how payment levels have evolved over time Using inverse probability weighted regression adjustment estimators we find no evidence that the PSNP reduces either chronic undernutrition height for age z scores stunting or acute undernutrition weight for height z scores wasting While we cannot definitively identify the reason for this nonresult we note that child diet quality is poor We find no evidence that the PSNP improves child consumption of pulses oils fruits vegetables dairy products or animal source proteins Most mothers have not had contact with health extension workers nor have they received information on good feeding practices Water practices as captured by the likelihood that mothers boil drinking water are poor These findings along with work by other researchers have informed revisions to the PSNP Future research will assess whether these revisions have led to improvements in the diets and anthropometric status of preschool children in Ethiopia

Public Works as a Safety Net Kalanidhi Subbarao, Carlo del Ninno, Colin Andrews, Claudia Rodríguez-Alas, 2012-12-11 A review of the conceptual underpinnings and operational elements of public works programs around the world drawing from a rich evidence base and analyzing previously unassimilated data to fill a gap in knowledge related to public works programs now so popular

Food Security, Safety Nets and Social Protection in Ethiopia Dessalegn Rahmato, Alula Pankhurst, Jan-Gerrit van Uffelen, 2013 This book which examines Ethiopia's food security strategy and the safety net program from different approaches and perspectives in the context of the development of a social protection policy is a continuation of that tradition Ethiopia's safety net program is one of the largest

and most influential social protection schemes in Africa and as noted by several authors in this volume provides important lessons beyond the Ethiopian context Back cover **The Global Financial Safety Net—A Stocktaking** International Monetary Fund. Strategy, Policy, & Review Department, 2025-10-09 The Global Financial Safety Net GFSN comprises international reserves bilateral swap arrangements regional financing arrangements and the International Monetary Fund It offers financing when crises occur and complements countries own policy responses in cushioning the impact of shocks The GFSN performed reasonably well during major crises like the Global Financial Crisis and the Covid 19 pandemic supporting financial stability and preventing broader disruptions However it did not need to bear the full brunt of these crises thanks to extraordinary policy actions of major economies that generated significant spillovers and reduced demand for GFSN resources Experience across GFSN layers has been mixed International reserves are the primary shock absorber but reserve adequacy is highly uneven Bilateral swap arrangements have prevented disruptions of market funding in key currencies limiting global contagion Yet they are less proven for balance of payments support and many lack transparency Regional Financing Arrangements offer an additional layer of support but remain rarely used except during the euro area crisis and unevenly distributed across regions The IMF plays a central role in the GFSN offering the widest form of international risk sharing thanks to near universal membership and helping prevent crises through macroeconomic surveillance Overall the GFSN remains multilayered and despite its large size coverage is uneven with many low income countries and emerging economies lacking sufficient access The rapidly evolving global context marked by more frequent shocks limited policy buffers and transformative trends could strain the GFSN Strengthening the GFSN requires addressing uneven access including by rebuilding reserves where needed improving predictability by making access more reliable enhancing crisis preparedness by incentivizing sound policies and fostering better coordination across GFSN layers **Measuring the Effectiveness of Social Protection** Ruslan Yemtsov, Maddalena Honorati, Brooks Evans, Zurab Sajaia, Michael Lokshin, 2018-06-13 Measuring the Effectiveness of Social Protection Concepts and Applications provides the conceptual and analytical framework for assessing social protection SP programs as well as provides a practical guide for users seeking to conduct analysis particularly using the World Bank's Software Platform for Automated Economic Analysis ADePT The manual provides a comprehensive unique resource to tie together social policy theory concepts and practical analytical techniques The book content is targeted at policymakers and practitioners worldwide seeking to improve the outcomes of their social protection policies It suggests advanced methods and a new rapid analysis instrumental for technical experts working on quantitative SP analysis for their ministry national statistics offices think tanks universities or development organizations The book aims to equip users with different statistical background and SP knowledge to independently conduct SP analysis and prepare a standardized set of tables and graphs to conduct different types of SP performance analysis ranging from benchmarking SP performance within and across countries simulating the performance of alternative reform options and

assessing the viability of proposed programs **From Evidence to Action** Food and Agriculture Organization of the United Nations, 2018-10-18 Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades However the impacts of cash transfers programmes especially in Sub Saharan Africa have not been substantially documented This book presents a detailed overview of the impact evaluations of these programmes carried out by the Transfer Project and FAO s From Protection to Production project The 14 chapters include a review of eight country case studies Kenya Ghana Ethiopia Zambia Zimbabwe Lesotho Malawi South Africa as well as a description of the innovative research methodologies political economy issues and good practices to design cash transfer programmes The key objective of the book is to enhance the understanding of these development programmes how they lead to a broad range of social and productive impacts and also of the role of programme evaluation in the process of developing policies and implementing programmes Social protection and resilience: The case of the productive safety net program in Ethiopia Abay, Kibrom A., Abay, Mehari Hiluf, Berhane, Guush, Chamberlin, Jordan, 2021-12-31 Improving household resilience is becoming one of the key focus and target of social protection programs in Africa However there is surprisingly little direct evidence of the impacts of social protection programs on household resilience measures We use five rounds of panel data to examine rural households resilience outcomes associated with participation in Ethiopia s Productive Safety Nets Program PSNP Following Ciss and Barrett 2018 we employ a probabilistic moment based approach for measuring resilience and evaluate the role of PSNP transfers and duration of participation on households resilience We document four important findings First although PSNP transfers are positively associated with resilience PSNP transfers below the median are less likely to generate meaningful improvements in resilience Second continuous participation in the PSNP participation is associated with higher resilience Third combining safety nets with income generating or asset building initiatives may be particularly efficacious at building poor households resilience Fourth our evaluation of both short term welfare outcomes and longer term resilience suggests that these outcomes are likely to be driven by different factors suggesting that optimizing intervention designs for improving short term welfare impacts may not necessarily improve households resilience and vice versa Together our findings imply that effectively boosting household resilience may require significant transfers over multiple years National safety nets programs that transfer small amounts to beneficiaries over limited time horizons may not be very effective
