DirectAccess Book Description Windows Server 2016 is an operating system designed to run on today's highly performant servers both on premise and in the cloud. It supports enterprise level data storage, communications management and applications. This book builds off a basic knowledge of the Windows Server operating system and assists administrators with taking the security of their systems one step further. You will learn tips for configuring proper networking, especially on multi-homed systems and tricks for locking down access to your servers. Then you will move onto one of the hottest security topics of the year: certificates. You will learn how to build your own PKI or how to better administer one that you already have. You will publish templates, issue certificates and even configure autoenrollment in your network. When we say networking we don't only mean inside the LAN. To deal safely with mobile devices you will learn about the capabilities of Windows Server 2016 for connecting these assets securely back into the corporate network with information about DirectAccess and VPN. The material in the book has been selected from the content of Packt's Windows Server 2016 Cookbook by Jordan Krause to provide a specific focus on these key Windows Server tasks. What you will learn: Implement solid networking and security practices into your Windows Server environment. Design your own PKI and start issuing certificates today. Connect your remote laptops back to the corporate network using Microsoft's own remote access technologies including DirectAccess. Learn to use commands that will help you with monitoring network traffic. Build and explore your first Server Core instance today. Who this book is for: If you are a Windows Server administrator interested in learning the key security and networking functions available in Windows Server 2016, keep this book close at hand. If you are a server administrator setting up certificate services for the first time, you will also benefit from the step-by-step instructions on implementation of a PKI.
